GLADSTONE'S MAJORITY.

Returns Up to Noon Give Him a Lead of Twenty-One Over the Salisbury Forces.

Hungarian Iron Workers Taken from Other Mills to Work for Carnegie.

The Chilean Congress Contemplates the Raising of Loans—Opium at Buffalo.

LONDON, July 16.—The election returns to noon give the Government 302 members and the Opposition 323.

Will Employ Non-Union Men.

PITTSBURG, July 16.—A notice has been posted at the mill this morning by the Carnegie Steel Company and sent all over the country to the effect that the Homestead mills will be started up with non union men on July 23rd and that any of the former employees of the company at the mill who did not take part in the recent disturbances are at liberty to make individual application for work till 6 p.m. July 21st. Those first applying will be given the choice of unfilled positions which they are capable of filling. Those who fail to apply by the time mentioned will be considered as not desiring to enter the company's service and their places will be filled with non-union men.

Steamer Tide left here this morning loaded with provisions for the Homestead works. The Carnegie Company has advertised for bids for the erection of 100 dwellings for workmen inside of their stockade around the mill. The company are receiving many applications for work including some from the old men.

POTTSTOWN, Pa., July 16.—A large number of Hungarians, employees of the Pottstown Iron and Steel Works, left their work to-day without giving any notice, and the accepted theory is that they have been engaged to go to Homestead and take the places of the strikers in the Carnegie mills. As a result of the foreigners' sudden departure, the Pottstown Iron Company is now advertising for American workmen to fill their places.

A Chilean Loan.

VALPARAISO, July 16.—The finance committee submitted a report recommending that Congress authorize the President to issue bonds to the amount of £1,800,000, for sale in Chile and Europe. The interest on these bonds is not to exceed 5 per cent. per annum, and a sinking fund amounting to 2 per cent. is to be provided. Interest on the loan will be payable in Santiago, London or Berlin, at the option of the holders, and the bonds are to be secured by the sums paid for export duties on nitrates and iodine. The President is authorized to arrange for a loan with the maximum of 6 per cent. interest. The sum realized is to be devoted to the extinguishing of the present floating debt of £1,800,000. There is considerable excitement at Iquique relative to the speeches of Edwardo Matto and Minister McIver upon the regulations of the nitrate combine. It is alleged the Government has not understood the mercantile affairs concerning the nitrate question.

To Suffer for His Second.

NEW YORK, July 16.—Hallett Alsop Borrowe, the hero of the unfortunate duel, to-day sent the following cablegram to a relative in Bernardsville, N. J.: "Harry fined $200; as my second is too ill to move, and funds are lacking, must surrender myself to Belgium government in his stead. Lord Dufferin, Minister to Paris, promises to have fine refunded in 10 days. (Signed) Hallett." The language of this cablegram has caused much comment among the acquaintances of the young man. It contains the first, and so far, only information that notice has been taken by the authorities of the duel. There is also much speculation as to just where in the Belgian code Mr. Borrowe found the Damon and Pythias provision which forms the basis for his alleged intention to go to jail in place of his sick second, Milbank.

The Loaded Revolver.

NEW ORLEANS, July 16.—Miss Emma Boudy, a young French girl, shot herself in the breast this morning. Her father, L. B. Boudy, is editor of the French evening paper, L'Orileans, and is also president of the French society. As such he directed the great 14th of July celebration at the fair grounds. After he arose this morning, his 18-year-old daughter went into his room to straighten out things. His revolver was lying on the table and she picked it up to put it away. In some accidental manner it was discharged and the girl fell with a scream. When the family rushed in she gasped out the words, "accidental," and became unconscious. There is little hope of her recovery.

The Cholera Scourge.

ST. PETERSBURG, July 16.—The epidemic of cholera is not so highly infectious as former outbreaks. Very few persons are attacked in proportion to the population but the disease is quickly fatal. The scourge is raging with extreme violence among the workingmen of Tiaritzin where many have died twenty-four hours after being attacked. Riots similar to those at Astrakahan are feared at Tifeles, where the butchers are excited over a decision of the authorities to destroy the old abbatoirs and build new ones. The religious committees at Moscow are organizing processions to appeal to God to stay the scourge.

Fatal Train Wreck.

BAKERSFIELD, Cala., July 16.—Freight train No. 27, south bound, was wrecked a mile and a half northwest of Bakersfield at 2 a.m. The wreck was caused by the engine striking cattle. The train ran about 200 yards after striking the cattle, with a steer caught under the pilot. The train left the track, and thirteen cars and the engine were piled up in one great mass. Two tramps were killed and it is thought more are in the wreckage, and brakeman Donly is badly scalded, perhaps fatally. The engineer and fireman are badly bruised.

BITTEN BY MOSQUITOS

And Thought to Have Smallpox—A Ferry Boat Accident.

NEW WESTMINSTER, July 16.—Wm. Stewart and Walter Eckhoff, the boys injured in the railway accident on Thursday, are out of danger.

The ferry committee of the city council last night investigated the accident to Thos. Jeffries, who had a limb broken upon the ferry at Surrey. The committee recommended the dismissal of engineer Chisholm, for not obeying the bells.

R. Russmussen, a Swede from North Bend, who was supposed to be afflicted with smallpox, turns out to have been badly bitten with mosquitos. Russmussen has been taken to the hospital.

Training and Studying.

BAY HEAD, Ills., July 16.—Thursday was the first time that Sullivan has stepped on the scales since he went into training in this vicinity. When he arrived here on July 5th he weighed 230 pounds. On Thursday he weighed but 222 pounds, showing a loss of eight pounds in nine days. Last night the big fellow remained out of bed later than usual for the purpose of studying his new play, "Captain Harcourt, or the Man from Boston," which has just been finished by Ed. Price, the New York lawyer.

American Irish Opinion.

NEW YORK, July 16.—The World this morning says: Eugene Kelly, discussing the English elections with a reporter yesterday said: "It is my opinion that it would be wisest for Mr. Gladstone to make no decisive move for home rule for a year or so. Mr. Gladstone will be stronger in a year than now. As to the question of funds for the Irish cause, I may say that there is no lukewarmness on the part of Ireland's friends in America. To-day I forwarded a draft for $50,000 to Justin McCarthy and John Dillon, and more will be forthcoming."

A Didn't-Think-It-Would-Carry Fool.

UNIONTOWN, Pa., July 16.—Jesse Guesman, aged 15, shot and fatally wounded Mary Yenier, aged 17, this evening. Guesman was practising some distance from where the girl was sitting, when she dared him to shoot at her, saying the gun would not carry half so far. Guesman instantly turned and fired. The ball entered the head; physicians say she will die. Guesman says he did not think it would carry so far, and the girl exonorates him.

Cannot Get a Chairman.

NEW YORK, July 16.—The World's Washington special this morning, speaking of the Republican national committee chairmanship, says: Ex-Senator Spooner, the tenth man who has been offered the position, has sent a long telegram to Senator Sawyer explaining that much as he might desire to serve the President in any capacity, he could not see his way clear to accept the position without neglecting important personal interests.

All Quiet at Wallace.

WALLACE, Idaho, July 16.—The coroner's inquest has been postponed until July 23rd. Everything is quiet and confidence is fully restored. There will probably be no further trouble. The leaders of the union are all under arrest. About forty men have been arrested, principally miners. General Carlin has gone to Mullan, leaving Major Thayer of the 14th infantry in command.

A Miner's Terrible Death.

SHAMOKIN, Pa., July 16. — John Fabouch was killed this afternoon in the Enterprise mine. While riding out from the slope bottom he raised his head too high and it was caught between two rocks projecting from the roof. The wagon passed from under him at the same time catching his foot and dragging him, so that his skull was crushed. He was found dead hanging from the roof.

Four at a Time.

PHILADELPHIA, July 16.—Mrs. J. Harkins, of Pearst, Frankfort, while on a visit to some friends at Sixteenth and Vine streets yesterday, gave birth to quadruplets, girls. Her husband heard of the sudden increase while eating his breakfast and has since been in a terribly exhausted condition. The mother and children are doing well and will be taken home in a few days.

Tennis Championship.

LONDON, July 6.—In the tennis championship contest, Miss Schacke won the Queen's cup, and J. Pim beat O. S. Campbell in semi-final for the London championship.

Pasteur Recovering.

LONDON, July 16.—The Lancet says Pasteur, the famous French scientist, has sufficiently recovered from cholera to take his customary walks.

Death of Prominent Men.

LONDON, July 16.—General Sir Arthur Hardinge, equery to the Queen, and Thos. Cooper, a former Chartist leader, are dead.

WASHINGTON, July 15.—U. S. S. Boston, now at San Francisco, has been ordered to Honolulu to relieve the U.S. S. San Francisco. This vessel will return to Mare Island Navy Yard and have her bottom cleaned.

Get prices from Victoria Litho raph Company for lithograph work before placing your orders.

Fine fishing tackle at Fox's, 78 Government street.

Dairy Kitchen opens to-day at 11 o'clock.

REASSURING REPORTS.

Only One New Case Reported and One Death in the Last Twenty-Four Hours.

Removal of McKay Severely Criticised—Chief of Police Reports on Chinatown.

Every Patient Now Out of the City, and Every Suspect Held in Quarantine.

Only one new case was discovered in the city within the past 24 hours, that of the colored man Gant, of Blanchard street, who has been ailing for some weeks, but who was concealed by his wife during that time. There was also one death, that of Daniel McKay, at the Jubilee Hospital. Miss Bull was removed from her home on Douglas street as a suspect. It has been decided that in future the hospital erected at Ross Bay will be used only as quarters for persons who may require quarantining, such as members of a family where a case has broken out, and persons who have acted as nurses.

Disappointment has been experienced in not receiving a supply of vaccine owing to the fact that no mail has been received for several days. A limited supply is expected this evening from the Sound, and a large supply will certainly arrive on Monday, sufficient for the needs of the city. Every person known to be afflicted by the disease has been removed from the city, the last being taken out to the Jubilee Hospital to-day. "All "suspects" are removed to the hospital grounds and placed in tents to await further developments.

G. L. MILNE,
Health Officer.

McKay's Case.

Yesterday afternoon the provincial police, accompanied by Dr. Wade, deputy provincial health officer, went to the house on Pandora avenue occupied by three brothers named McKay, one of whom, Daniel, has been ill with smallpox for eight days. Dr. Crompton, assistant city health officer, had been attending the case. Against the positive orders of Dr. Crompton, the patient, his brother, who has the disease slightly, and the nurse were taken from the house by force, hustled into the ambulance cab and driven to the Jubilee quarantine station where John died in a few minutes after being placed in the ward.

When the provincial authorities went round to the house they found the door locked. They demanded instant admission; this was refused and neither threats nor persuasion could induce the inmates to open the door. The policemen then attacked the windows; the inmates defended them too, and several lights of glass were broken in the struggle. The police were informed that Dr. Crompton had ordered that the patient was not to be removed, but this did not deter the officers, who continued their efforts to gain an entrance. They finally threatened to beat down the door with a beam which they procured if it were not opened, and the besieged, seeing that further resistance was of no avail, reluctantly opened the door and allowed the police to come into the house. The authorities promised that every care would be taken of the sick man, and he was muffled up, placed in the cab and the two others put in with him, and the whole party set out for the quarantine grounds. The sufferer looked very ill, and after he was placed in the ambulance bore undoubted symptoms of approaching death. His sufferings were by no means decreased as the vehicle rumbled out to the hospital. He was dying when lifted from the cab to the ward.

Dr. Crompton was seen this morning by a TIMES man. He had not much to say about the affair, but stated that the patient had been under his care for the last eight days It was a severe, but by no means hopeless, case. In the doctor's opinion the man had passed the critical stage and was on the way to recovery. He had issued orders that this man was not to be removed under any circumstances while in this condition. He was not consulted as to whether the patient should be removed or not, and he therefore could not assume any responsibility in the matter. It was certainly an unwise thing to remove a patient in such a state of health. This was the only case among those in the city that he had ordered not to be removed. Why the provincial authorities had done what they had in this instance he could not say.

Dr. Milne was then interviewed, and said: "I was not consulted at all about the removal of this man. I knew that he was under Dr. Crompton's immediate care. The case was reported to me as a bad one. He had been under medical treatment, I think, eight days. The man was certainly removed without my sanction."

Not Likely.

The Vancouver people apparently want to make out that a case found in New Westminster was taken from Victoria on the Yosemite. This is well nigh impossible, since all passengers who went on the steamer from here were carefully examined, and the disease could not have broken out on any of them so soon afterwards. This steady manufacture of rumors intended to prejudice Victoria shows how well affected the Vancouver people are towards this city.

The Injunction Continued.

In the Supreme Court to-day, Mr. Justice Crease presiding, Hon. A. N. Richards, Q.C., on behalf of the corporation of Vancouver moved that the injunction restraining the corporation of Vancouver from preventing the landing of passengers from Victoria be set aside. Mr. Richards argued for several hours quoting numerous cases. He held that the C.P.N. Co. should not be allowed to land passengers at Vancouver, thereby spreading the disease throughout that city.

"Have they any smallpox there?" asked His Lordship.

"Six or seven cases" said Mr. Richards.

Mr. Justice Crease—"How many more?"

Mr. E. V. Bodwell, who appeared for the C.P.N. Company, held that the order of the court had not been obeyed by the corporation of Vancouver and in fact the people had been boasting of it. He, however, refrained from moving that the parties be committed for contempt, out of respect for Mr. Richards, who told him that he intended to make the motion now being argued. The city had disobeyed the orders by preventing the passengers landing by threatening to quarantine them if they did so.

Mr. Richards held that the health officer had acted very fairly by warning the passengers that they would be quarantined if they attempted to land.

Mr. Bodwell said when the officers told the passengers that they would be quarantined if they landed, they were disobeying the order of the court, as they were interfering with the landing of passengers. The by-law that the city of Vancouver was working under in this case was probably taken from the by-law of some eastern city where no such autrocratic action would be attempted. The fact of keeping a man, not infected, in quarantine was too absurd to be considered. All they had the power to do was to detain and examine passengers and if they were infected to quarantine them. They had enough proof, however, that the passengers were not infected as the company sent up a clean bill of health and then they had their own health officer to examine the passengers. It is not to be assumed that every man from Victoria has been exposed to the disease. All the city has power to do is to regulate, not to prohibit, the landing of passengers. The city of Vancouver might say we will prevent Victoria from dealing with eastern Canada.

Mr. Richards could not see why Vancouver should be forced to allow passengers to land, especially as the whole world at present considered Victoria a dangerous place to deal with.

Mr. Justice Crease, "Do you call it common sense for people to consider that?" When he saw the city by-law he saw at once that the city was acting even in excess of what they themselves claimed by their by-law. They have the power to examine passengers and if they find them infected they have the power to detain them. He did not consider therefore that they had the power to detain all passengers. Before the passengers leave here they are examined and it should not be assumed that they have smallpox. One is rather shocked to hear that persons supposed to be infected (when it is a fact that not one is) should be allowed to land at Port Moody or anywhere. It seemed as though it was a question of the expense of looking after anyone found infected. He did not, therefore, think that the injunction could be dissolved.

Died at Albert Head.

The news of the death of the young man William Short at Albert Head quarantine station on Thursday night at 6 o'clock, reached the city in such a desultory and unofficial manner that the story related at the city health office could not be accepted until some stronger proof was obtained. The waterman who takes the water from the city to the quarantine station was told to inform the health officer about it when he got back to town. The waterman arrived at 11 p.m. and could not find Dr. Milne and next day the doctor heard it at third hand. Later in the afternoon sanitary officer Bailey was notified and he reported to the health officer. Dr. Crompton, Dr. Milne's aide, was at Albert Head yesterday and saw the body properly interred. Short was a fine young fellow and had served a term in the Northwest mounted police, and bore an excellent character.

Building For "Suspects."

Dr. Davie's statement that Mayor Beaven had failed to provide a building for "suspects," is untrue, as the following letter will prove:

VICTORIA, July 16, 1892.

Dr. G. L. Milne, Medical Health Officer for Victoria.

DEAR SIR—In view of the statement over the signature of J. C. Davie, M. D., in the morning paper, that "I have failed to provide a building for 'suspects,' in spite of his urgent request for the same," I desire to say to you that should you deem it advisable at any time to make a change in your present arrangements as regards "suspects," the building at Ross Bay is at your disposal. It is at present occupied by the children from the Protestant Orphans' Home, but my arrangement with the managers of that institution provides for their vacating it at once should you require to use it. I stated the same thing to the Honorable Theodore Davie, Premier, etc., last Thursday evening.

I am yours faithfully,
ROBERT BEAVEN,
Mayor.

The Chief's Report.

The chief of police reported to the city health officer to-day as follows:

Victoria July 16, 1892.

To Dr. Milne.

SIR—I have the honor to report that I visited Chinatown this morning and I am happy to state that not one case has been reported as yet. I have the honor to be sir, your obedient servant, HENRY W. SHEPPARD, Supt. of Police.

An Unfitness Form.

The following vaccination form has been supplied the medical men of the city by the medical health officer, Dr. Milne, and to borrow a phrase from the Colonist "it speaks for itself."

SCHEDULE B.

Certificate of unfitness for vaccination.

I, the undersigned, hereby certify that I am of opinion that the child of of Ward, in the City of aged is not now in a fit and proper state to be successfully vaccinated, and I do hereby postpone the vaccination until the day of Dated this day of 189.

Captain Rudlin in Town.

Captain Rudlin, who was in custody at Vancouver yesterday for entering Port Moody without papers, came down on the Islander this morning. He did

SANITARY and other WALLPAPER

CANADIAN NOTES.

News by Mail and Wire From All Parts of the Dominion.

At Grenfell Assa., Hugh McPherson was struck by lightning and instantly killed.

It is practically settled that the Soo railway junction will be made at Regina.

The directors of the exhibition at Winnipeg have extended the time of receiving entries to July 21st.

The ship Allan A. Reed, with 2689 tons of raw sugar for Montreal, went ashore at Pointe aux Trembles.

Hon. J. M. Gibson, Provincial Secretary of Ontario, has returned to Toronto from a trip to the Pacific coast.

Potato bugs and turnip flies are devastating the crops in Prince Edward Island. The farmers are sowing turnips over again.

Mother Lourdes, first Superioress of the Home of the Good Shepherd, of Halifax, died in Montreal. She was Miss Martin, of Halifax.

The merchants of Montreal have dispatched 9000 barrels of flour, 6000 feet of lumber and several tons of provisions to St. John's, Nfld., as a commercial venture.

The steamship Virginian lost 37 cattle between Montreal and Father Point on her last trip out. It is feared that many more will die before the vessel reaches Liverpool.

Noble Kinney, aged 21, threw himself into the Niagara river and was carried over the American Falls. He left a note attributing his trouble to a woman. He came from Toronto on July 1.

The John Doty Engine Company, of Toronto, is in financial difficulties, and the creditors have failed to agree. The estate is valued at a quarter of a million dollars, and will be sold by auction.

Hypolite Thouin, of Montreal, while working on the Royal Electric Light Company's chimney, 140 feet from the ground, missed his footing and was literally dashed to pieces on a pile of bricks.

Vail Goldschmit, a cloak maker, uttered several forged notes in New York, some months ago, and disappeared. One of them was on the First National Bank of Brooklyn, for $1000. He was arrested in Montreal for the offence.

At the nomination for the vacant seat for Marquette, in the Commons, Thursday, N. Boyd, of Carberry, Conservative, was elected by acclamation. He succeeds Robert Watson, Liberal, who resigned to take office in the Manitoba Government.

Statistics issued by the Dominion Immigration office in Montreal show that the total number of immigrants arriving at the Montreal agency during the half year ending June 30 was 7876, against 4254 for the same period last year, an increase of 2622.

A couple of shoddy peddlers have reaped a rich harvest from the farmers of Nelson township. They alleged that they represented a large wholesale concern at Toronto, similar to the Patrons of Industry stores, which would send out tailors to make up goods sold by them, also that the purchaser would be entitled to get from the concern anything further that might be wanted at wholesale rates. The swindlers took notes at four months for from $48 to $65 for stuff not worth $25.

The Montreal city solicitor has given an opinion that the present street railway company has the power to use electricity on the present rails. The company will accordingly take advantage of the right and commence to change the service into the electric system on Monday, using the trolley system. This is considered a clever way of settling the street railway difficulty, but the other companies tendering for the franchise threaten an injunction.

About 2 o'clock Thursday morning Mr. Owens, who lives six miles south of Cartwright, Manitoba, on the International boundary, was aroused by three kidnappers from Dakota, who attempted to forcibly take H. Mills with them. They put Mr. Owens and his son in a room and guarded them with revolvers. They then dragged Mr. Mills from his bed and tried to put him in the rig. Mills fought desperately and took the handcuffs from them and ran away. They fired two shots at him without effect and immediately decamped, having taken Mills' pants and money. The authorities will investigate.

The Wreck of a Torpedo Boat.

NEW YORK, July 15.—The Herald's correspondent at Buenos Ayres telegraphs particulars of the wreck of the Argentine torpedo gun boat, the Rosahes. There is every reason to believe that the vessel sprung a leak. It appears the Argentine naval officers advised the Minister of the Navy not to permit the Rosahes to go on a voyage to Cadiz, Spain, but they were overruled by Admiral Solier, who is in command of the squadron. Nothing has yet been heard of the crew of the Rosahes, except those who landed in the whaleboat on Cape Polon. The six sailors who are reported to have reached the Brazilian coast, the survivors of the wreck who have been heard from, think that other boats may yet arrive on the Rio Grande de Sul coast near Loguna. The Almirante Brown and the Twenty-Fifth of May, which were with the Rosahes when the terrible calamity overtook her, and about whose safety grave fears were entertained, appear to have escaped serious damage. A despatch from Rio Janeiro states that they have passed Cape Frio, bound north.

Starch grows sticky, common powders have a vulgar glare: *Pozzoni's* is the only complexion powder fit for use.

The smallpox has proved to some that it does not pay to have washing done at Chinese wash-houses. Wake up lovers of cleanliness and patronize the Steam Laundry.

Genuine Boston baked beans at the Dairy Kitchen to-day.

Fresh ranch eggs, creamery butter, pure cream and pure milk, at the Dairy Kitchen.

General James B. Weaver.

General James B. Weaver, the candidate of the People's party for president was born in Dayton, Ohio, June 12, 1833, and graduated from the law school of the Ohio University, Cincinnati, in 1854. In April 1861, he enlisted as a private in the Second Iowa infantry; and on October 3, 1861, was made major. In 1863 he was brevetted brigadier general for gallantry in action. After the war he resumed legal practice, was elected district attorney and later served six years as assessor of internal revenue for the fifth Iowa district. In 1874 he was elected to Congress. In June of the following year he was nominated for the presidency by the Greenback Labor party and in the election following received 307,740 votes. In 1885 he was returned to Congress by the vote of the Greenback Labor party. He was re-elected two years later. Since then he has been active in all political reform movements and was one of the founders of the People's party at the Cincinnati convention something less than ten years ago.

Cholera Causes Riots.

ST. PETERSBURG, July 15.—Owing to a report of doctors having caused cholera patients to be buried alive, the lower classes of Saratoff revolted, wrecked and plundered the police station, cholera hospitals and residence of the chief of police and physicians. The medical assistants were attacked and two killed. On the arrival of the troops the mob resisted, and the soldiers were ordered to fire, killing three and wounding four others. The rioters then dispersed.

Since last reported 20 new cases of cholera and 11 deaths have appeared at Simbirisk. It is asserted that cholera has appeared in Moscow, where there are 35 cases in the hospital, but no deaths have occurred. The disease continues to spread. It is reported that cholera has broken out near Jeletz.

Astrakhan has become the chief nursey of cholera on this side of the Caucasus. The latest reports from Astrakhan say that in one day 225 persons were attacked with cholera, and 102 others died. The Astrakhan Messenger publishes details of the recent riots growing out of the epidemic. A mob held the town for two days, the hospital was burned down and all the medical staff were more or less injured. One doctor and assistant were brutally beaten and trampled to death. The patients in the hospital were carried to the banks of the Volga and fed with milk as a supposed antidote to the poison administered by the doctors. Several succumbed to this treatment. Only the firing of a volley by the infantry brought the maddened mob to reason.

Fire at Anacortes.

ANACORTES, July 15.—At 2 o'clock yesterday afternoon the main building of Bailey & Uphus' sash and door factory was discovered to be on fire, and before the alarm could be sounded smoke and flames were issuing from the roof of the building. Everything was dry as powder, and a fresh breeze from the north soon fanned the fire into flames, which enveloped the entire building. Within three-quarters of an hour after the fire was first discovered the roof fell, burying all but one piece of machinery in the ruins. The building was burned to the ground, but it is hoped that the machinery is not entirely destroyed, though it must be badly scorched. The dry house and other mill buildings separated from the main structure were saved. The loss will probably reach $22,000, with little insurance. W. W. Bailey is the manager of the company and owner of most of the stock. He was formerly with the Western Mill Company of Seattle, but had conducted the business here for the past two years. Since starting the company has supplied most of the building trade of the county with the products of the mill. It is a singular fact that just one year ago to-morrow the same company suffered a loss of several thousand dollars through the destruction by fire of their dryhouse, which was well stored with lumber.

Thomas Cooper, the Chartist.

LONDON, July 15.—The death of Thomas Cooper, the famous chartist, is announced this evening. He was born at Leicester, March 28, 1805. He learned the trade of a shoemaker, instructing himself at the same time in Latin, Greek, Hebrew and French. He became the leader of the Leicester Chartists in 1841. He lectured during the riots in August, 1842, and was sent to prison for two years for sedition. While in prison he wrote several works. He was connected with newspaper work for a time. The latter part of his life was spent in lecturing throughout England and Scotland.

Burial of Cyrus Field.

DOBBS FERRY, N.Y., July 15.—The funeral of Cyrus W. Field took place at Arsdley Park at 5 o'clock yesterday. Bishop Henry C. Potter conducted the simple burial service of the Episcopal Church. After service at the house the members of the family and a few intimate friends proceeded to Stockbridge, Mass., where the remains were placed in the family vault.

Children Cry for Pitcher's Castoria.

Mysterious Shooting.

DANBUY, Conn., July 15.—Chas. Crosby, one of the wealthiest and best known men in North Salem, Winchester County, N. Y., is dying as the result of a mysterious shooting affair that happened on Wednesday afternoon. All the facts were kept secret until it became known that the victim would die. Several neighbors heard a number of pistol shots about two o'clock Wednesday afternoon. A few minutes later Mrs. Crosby, the children and a man ran out in the yard in a state of excitement. Soon afterwards Mr. Crosby's mother went to a neighbor and asked him to go for a doctor. The neighbor asked what was the trouble, and Mrs. Crosby replied: "Nothing, Charlie is not very well this morning." Blood was on her hands and clothing. Dr. Potter was summoned, and when he reached the house every door and window was closed and the curtains drawn. Since then no one except the doctor has been admitted to the house. Mr. Crosby's wife made an attempt on Wednesday to hire a conveyance to take her to Purdy's station, a few miles distant, but was unable to do so. Dr. Potter admitted yesterday that Mr. Crosby was shot near the heart and also in two other places, and would die, but could not or would not say who fired the shots. Crosby has been known as eccentric, and was extremely jealous.

DIXON, Cala., July 15.—Fire last night destroyed McLean & Mayhew's livery stable, with 10 horses. Loss $5000. No insurance.

Mr. John Hungerford

Proprietor of the fine livery stable at the West End hotel, Elmira, N. Y., says Hood's Sarsaparilla goes way ahead of anything he ever took for troubles with the

Liver and Kidneys

with which he suffered for a long time, until he took Hood's Sarsaparilla and was completely cured. Other members of his family also take

Hood's Sarsaparilla

and are highly gratified with the benefit from it.

HOOD'S PILLS are a mild, gentle, painless, safe and efficient cathartic. Always reliable. 25c.

Notice to the Public.

HAVING heard so many reports about town that most of the Expressmen are carrying smallpox patients to the Quarantine Station, and finding it detrimental to our business, we think it nothing but right that we, the undersigned express and draymen, beg to inform the public that we have not carried patients infected with smallpox, and that our wagons and drays are free from infectious disease.

Notice to the Public.

I WISH to notify the public that the Victoria Transfer Company have strictly refused to carry any persons or baggage in any way connected with smallpox, and that all our drivers have had special orders from the time the first case was known in the city, to avoid and refuse any connection whatsoever with the disease. All our premises and conveyances are regularly and systematically disinfected, and I can therefore safely and conscientiously recommend our hacks and wagons to our patrons and the public.

THE KOOTENAY COUNTRY.

High Water—Storm at Pilot Bay—Mining Notes and News.

From the Miner.]

NELSON.

Nelson celebrated the first of July in a very enthusiastic manner.

Married—At the residence of Captain McMorris, on Thursday evening, July 7th, by the Rev. T. H. Rogers, B.A., John Hamilton to Jennie Rath.

Mr. Jowett returned from Slocan on Monday. During his visit he saw most of the big prospects and reports them being fully as good as supposed.

The Kootenay reclamation works progress as fast as the high water will permit. Mr. G. H. Keefer, who is in charge, has derived one benefit from the unusually prolonged flood. It has enabled him to thoroughly explore all the land that is to be reclaimed in a canoe. He does not anticipate much difficulty in carrying out the designs of the company.

The storm on the evening of June 30th struck Pilot Bay with tremendous force. A scow moored to the wharf, and the property of the Alberta & B. C. Exploration Company, had its roof blown off. The Galena Trading Company's store was blown six inches out of plumb. This was made possible by the excavations for a cellar which were going on underneath.

KASLO.

Kaslo has this week welcomed her first cow.

Mr. Tod has established an architect's office on Front street.

Mr. H. W. Bucke, recently of Ottawa, has opened a law office in this town.

It is rumored that we are at last to have a postoffice; it is certainly badly needed.

The survey of the Nashville townsite on the forks of the Kaslo river was completed last week.

G. O. Buchanan's mill is nearing completion; the machinery will be put in without delay.

The Nelson Sawmill Co. have established a yard here; B. H. Lee & Co. are their agents.

A placer mine has been located on a creek near the head of the lake; no reliable details as yet to hand.

T. J. Chambers reports a strike on the east side of the lake nearly opposite Kaslo. The ore carries free milling gold and silver. An assay gives 116 oz. silver and $18 gold to the ton.

Building operations are proceeding briskly. Carney & Barrett's butcher shop is practically completed; Giegerich's store, and the hotels of Mahoney, Devlin & McKay and E. Baum are nearly finished, and the work is going on steadily on Hancocks & Rice's store on A avenue.

B. Chambers has sold his one-eighth interest in the Slocan Star to White Bros., for, it is stated $3000. Messrs. White now own the whole claim, which, according to the unanimous reports of all who have seen it, is one of the most marvelous surface showings ever discovered.

On Wednesday evening a fire started close to the church on B avenue. The church was saved with difficulty, but as there was a strong breeze blowing down Kaslo creek it was found impossible to stop the fire before it had destroyed Clancy's cabin and the building Pearse was putting up for a laundry. A Chinese washerman was in the line of fire, but as he did business in a tent he managed to save his effects.

AINSWORTH.

The new wharf has succumbed to the united attacks of steamboats and waves. Owing to the nature of the bed of the lake the piles lifted and the wharf does not now exist.

Mineral claims recorded at Ainsworth, Hot Springs district:—Pauper's Dream, situate two and a half miles east of Bear Lake, R. McLeod, locator; Mirtle R., one mile west of Whitewater Creek; Kaslo, E. Spencer, locator; London, five miles east of Bear Lake, C. Moerkerke, locator; White Elephant, on Lile Creek, Kaslo, W. W. Winchester, locator; Appleton, on Elk Creek, five miles south of Balfour, J. Wright, locator; Irene on Whitewater Creek, Kaslo, A. D. McDonald, locator; Excelsior, between Bear and Fish lakes, J. D. Moore, locator; Iron Horse, on Liddle Creek, Kaslo, D. McMillan, locator; Lincoln, 1½ miles south of Bear Lake, L. W. Parkinson, locator; Celebration, one and a half miles south of Bear Lake, E. Harrop, locator; Sehome, one and a half miles north of Bear Lake; Carbonate, on Spring Creek, Kaslo, D. E. Crafts, locator; Cowboy, on Spring Creek, Jack Stuckie, locator; Canada Boy, on Woodberry Creek, L. E. Brassard, locator; Blue Jay, on Spring Creek, Harry Matthews, locator; Maverick, on Spring Creek, R. R. Cameron, locator; Alice, on Spring Creek, John H. Fink, locator; Mountain Goat, on Spring Creek, Z. Shaker, locator; Fourth of July, on Kaslo Creek, C. T. Steele, locator; World's Fair, on Goat Creek, Kaslo, W. Meadows and H. McDonald, locators; St. Louis, fifteen miles south of Pilot Bay, A. Short and J. H. Brown, locators. Transfers, T. V. Thurburn to C. W. Busk full interest in the Out Set; consideration, $1; E. C. Camplan to J. C. Eaton, two-thirds interest in the Whitewater, situate on Kaslo Creek; consideration, $1; A. D. McDonald to J. C. Eaton, one half interest in the Irene, situate on Kaslo Creek; consideration, $1; James Mueck to James Bell, one third interest in the Last Chance, on Kaslo Creek; consideration, $1.

Hood's Pills cure Sick Headache.

Children Cry for Pitcher's Castoria.

Orange and Green.

LONDON, July 15.—At Banebridge, County Down, a number of Orangemen, headed by a band, tried to celebrate the election of T. W. Russell, the Unionist leader, who was returned from South Tyrone yesterday. During the return march, the Orangemen were passing the house of a Catholic named Winter, in the outskirts of Banebridge, when somebody discharged a gun from a window at the procession. The Orangemen thereupon attacked the house and after a severe struggle, succeeded in wrecking the building and also obtaining possession of the gun which had been fired at them. The family that occupied the house escaped by the back way and notified the police. The latter found the dwelling ruined, the furniture smashed, the windows broken and the walls delapidated. The police gave chase to the Orangemen and overtook them early this morning, as they were entering the town singing "God Save the Queen." The police demanded the names of the party; the Orangemen refused, and the police thereupon undertook to arrest them. A fight ensued and the Orangemen were overpowering the police when assistance arrived and the police got the upper hand. The police were satisfied with taking the names of the ringleaders with a view to prosecution. The affair has caused such a ferment in the vicinity that an extra force of police has been drafted to Banebridge. Rioting was resumed at Portadown to-day, notwithstanding the presence of a large force of police. The opposing parties had a vigorous encounter in the streets; they would not disperse at the command of the police, who charged with fixed bayonets on the mob, wounding several persons, and compelling the conbatants to retire. In the course of the affray, houses in the vicinity were badly damaged by stones and other missiles.

MOTHERS WHO USE IT ARE HAPPY AND THANKFUL.

Physicians are Delighted and Recommend It.

LACTATED FOOD PRAISED BY ALL.

Lactated Food has saved thousands of young infants!

It will do the same for your baby, dear mother!

Have you seen a baby that has been fed on Lactated Food!

It looks bright, hearty and happy; it rests and sleeps well!

Do you know why so many mothers enjoy life and avoid all the home worries?

It is because they feed their babies on Lactated Food!

Why are so many infants cut down by summer complaints?

Because they are not nourished with health-giving food!

Why do our physicians so strongly recommend Lactated Food?

Because it contains all the important elements of pure and healthy breast milk!

Babies fed on Lactated Food need no medicine!

It is wholesome food, and babies love it!

Try it, mother, if your baby is not healthy and strong.

In a short time the result will surprise you!

The mother's happiness and baby's welfare DEPENDS ON LACTATED FOOD!

K. D. C., is the best known remedy for dyspepsia. Ask your druggist for it, or apply to Beckwith, Thompson & King, agents for B. C.

TENDERS FOR DEBENTURES.

SEALED TENDERS, endorsed "Tenders for Debentures," will be received at the office of the undersigned on or before Saturday, the 20th August, 1892, at 4 p.m., for the purchase of debentures of the Corporation of the City of Victoria, B.C., amounting to $185,000 or thereabouts, in sums of $2000 each, payable in 25 years from date of issue, and bearing interest at 5 per centum per annum with principal and interest payable in currency either in Montreal, Canada, or New York, U.S.A.

The above debentures are issued under authority of "The City of Victoria Act, 1892."

The Corporation does not bind itself to accept any tender.

(Signed) WELLINGTON J. DOWLER,
City Clerk.

City Clerk's Office,
Victoria, B.C., July 13th, 1892. jy14

A BY-LAW

In Aid of the Victoria and Sidney Railway Company.

WHEREAS, under and by virtue of an Act of the Legislative Assembly of the Province of British Columbia passed at the last session, intituled, "The Victoria & Sidney Railway Act, 1892," a company was incorporated with power to lay out, construct, maintain and operate a line of railway from some convenient and accessible point within the City of Victoria by the most feasible and available engineering route to the Townsite of Sidney in the District of North Saanich.

AND WHEREAS, under and by virtue of another Act of the said Legislature passed at the last session thereof, intituled, "The Victoria & Sidney Railway Subsidy Act, 1892," power was taken by the Government of British Columbia to guarantee the payment of interest, until maturity, at two per cent. per annum on bonds of the said railway company, issued to an amount not exceeding $300,000, or its equivalent in sterling money, the principal of such bonds to be payable not later than 25 years from their date.

AND WHEREAS, under and by virtue of section 104, subsections, 2, 3 and 4 of the Municipal Act, 1892, the Council in every municipality is authorized from time to time to make by-laws among other things for endorsing and guaranteeing the payment of any debentures or interest on any debentures to be issued by any railway or tramway company, constructed or proposed to be constructed, either wholly within the limits or partly within the limits and partly without, for the money by them borrowed, and for assessing and levying, from time to time, upon the whole rateable property of the Municipality a sum sufficient to discharge the debt or engagements so contracted.

AND WHEREAS the said Railway Company have applied to the Corporation of the City of Victoria for a guarantee of payment of interest on certain of the bonds of the said Company upon the railway proposed to be constructed by the said Company, by virtue of the said charter, to the amount of three per cent. on the sum of $300,000, for a period of 25 years.

AND WHEREAS, under and by virtue of the foregoing recited Act, intituled the "Victoria and Sidney Railway Subsidy Act, 1892, provision is made in clause 2 thereof that in case, at any time, an agreement is entered into by the Company with the Corporation of the City of Victoria for the furnishing by the said Corporation of a guarantee of payment of interest to a further amount of two or more per cent. on the bonds of the Company, up to not more than $300,000, the Government may make such arrangements for permitting the said Corporation to share any security taken by them for advances hereunder, and such provisions as to the manner of holding the same as to them may seem fit.

AND WHEREAS the said Company was thereby empowered to charge its undertaking and its tolls and property, real and personal, with the repayment of all the moneys paid by the Provincial Government in respect of the guarantee thereby authorized second and subject only to the charge given in favor of the bondholders under the Company's Act of Incorporation, and with further power to the Lieutenant-Governor in Council to enter into all agreements which might be necessary for the purpose of carrying out the provisions of the said Act.

AND WHEREAS it is desirable that a guarantee of payment of interest on bonds by the said Corporation should be made, and an agreement to that effect entered into by the said Corporation with the said Company, and that an arrangement should be made by the said Corporation with the said Government for permission to the said Corporation to share any security taken by the said Government for advance by them and by the said Corporation and otherwise as provided by the said Act.

AND WHEREAS it will require the sum of $9000 to be raised annually by special rate for paying the amount of the said guarantee in the event of the said Corporation being called upon to pay the same.

AND WHEREAS the whole amount of the rateable land and improvements of real property of the Municipality, according to the last revised assessment roll, is $17,563,148.

AND WHEREAS it will require an annual special rate of half a mill on the dollar for paying the amount of such guarantee in the event of the Corporation being called upon to pay the same.

AND WHEREAS the total amount of such guarantee in the event of the Corporation being called upon to pay the same is $900.0.

THEREFORE BE IT ENACTED by the Municipal Council of the Corporation of the City of Victoria:

1. There shall be assessed and levied in each year an equal special rate of one-half of one mill on the dollar in addition to all other rates to be levied in each year for the payment of the interest payable under the said guarantee.

2. The amount of such special rate shall be collected in each year from time to time as the said Corporation may be called upon to pay the amount of the said guarantee.

3. The Corporation of the City of Victoria shall guarantee interest at the rate of three per cent. per annum on the bonds of the Victoria & Sidney Railway Company to the amount of $300,000 for a period not exceeding twenty-five years from the date of this By-Law going into effect, under and subject to the conditions prescribed in this By-Law.

4. Any sum or sums of money which may hereafter be paid by the Corporation under this guarantee shall be a first charge upon the undertaking, tolls and property of the said Company, subject only to the said bonds and to such division thereof as between the Government of British Columbia and the Corporation as may be agreed upon by the said Government and the said Corporation, and the acceptance of the benefit of this By-Law by the said Company shall be deemed conclusive evidence of the assent of the said Company to all the terms of this By-Law.

5. All the moneys obtained from the proceeds of the said bonds in respect of which interest is guaranteed by the said Corporation shall be applied by the said Company in payment of the right of way, construction, equipment of the said railway and expenses incidental thereto.

6. It shall be lawful for the Mayor for the time being of the Corporation of the City of Victoria to endorse, or cause to be endorsed, on the said bonds so proposed to be issued by the said railway company the guarantee in the form and manner prescribed in the memorandum of agreement set forth in the schedule attached to this by-law, and for the Clerk of the said Corporation to countersign and seal the said endorsements.

7. This by-law is passed upon the express condition that the said Company shall actually and bona fide commence the work of construction of the said railway on or before the first day of October, 1892, and thereafter prosecute the same with reasonable diligence until the completion of the railway ready for active operation; in any event such date of completion not to be later than the first day of September, 1894, and that a failure to observe such time limit or limits shall render the Company liable to a penalty of One Hundred Dollars ($100) per day for every day beyond such time limits the Company shall be in default in commencing or completing the said road, which said penalty may be recovered by action in any Court of competent jurisdiction at the suit of the Corporation or Government aforesaid.

8. The said Company shall not directly or indirectly employ Chinese upon, about or in connection with the work of construction, and in the event of so doing, or of any of the said Company's employees or any sub-contractor under them so doing the Company shall be liable to a penalty of ten dollars ($10) for each day for each Chinese so employed, to be recovered as specified in Clause 7 of this By-Law.

9. The Company shall not pay any dividends to any shareholder or other person so long as any money remains due or owing to the said Government or the Corporation of the City of Victoria in respect of the said guarantee.

10. The said Railway so to be constructed shall be of a standard guage and to be operated by steam power, and one train per day (Sundays excepted) shall be run over the said line from each end thereof.

11. Plans of the location of so much of the line and terminal works of the said Railway as shall be within the limits of the City of Victoria shall be filed by the Company in the office of the City Clerk, and shall be subject to the approval of the Municipal Council before any work of construction shall be proceeded with within such City limits.

12. All expenses connected with, or incidental to the passage of this by-law, shall be borne and paid by the said company to the corporation of the City of Victoria before this by-law shall be submitted to the ratepayers.

13. No contract in connection with the construction of the said proposed railway shall be let to any person or persons, firm or corporation, who have not been for over six months prior to the date of calling for tenders for the said contract, resident or residents of the said Province, from the date of receiving tenders for the said work.

14. This by-law is subject to the agreement made between the Government of the Province of British Columbia, and the Corporation of the City of Victoria, and the Victoria and Sidney Railway Company, in the words and figures set forth in the schedule hereto, which schedule is hereby incorperated herewith, and made part of this by-law.

15. This by-law shall, before the final passage thereof, receive the assent of the electors of the municipality, in the manner provided in the Municipal Act, 1892, and shall take effect on the 25th day of July, 1892.

SCHEDULE.

MEMORANDUM OF AGREEMENT made and entered into the seventh day of July, one thousand, eight hundred and ninety-two, between the Victoria & Sidney Railway Company hereinafter called the Company of the first part, the Corporation of the City of Victoria, hereinafter called the Corporation of the second part, and the Minister of Finance and Agriculture, acting for and on behalf of the Province of British Columbia, hereinafter called the Minister of the third part.

WHEREAS, The Company are duly incorporated under the provisions of the Victoria & Sidney Railway Act, 1892, and in and by the said act the Company are empowered to borrow money on mortgage or on bond or either, and they may in manner prescribed in the act issue bonds not exceeding twenty thousand dollars ($20,000.00) per mile of railway, payable at such time and in such manner and in such place or places in Canada or elsewhere, and bear such rate of interest not exceeding eight per cent (8 per cent) per annum, as the Directors may think proper.

AND WHEREAS, by section one (1) of the Victoria and Sidney Railway Subsidy Act of 1892," it is provided that the Government of British Columbia may guarantee the payment of interest until maturity at 2 per cent. per annum on bonds of the company issued to an amount not exceeding three hundred thousand dollars ($300,000) or its equivalent in sterling money, but subject nevertheless to the conditions and restrictions in the said section contained, and the company are thereby empowered to charge its undertaking and its tolls and property, real and personal, then existing, or at any time thereafter acquired, with the repayment of all moneys to be paid by the Provincial Government in respect of the guarantee thereby authorized, subject to the rights of the bond-holders for payment of the principal of the bonds at maturity.

AND WHEREAS, by section two (2) of the last mentioned act it is provided that "in case at any time an agreement is entered into by the company with the Corporation of the City of Victoria for the furnishing by the said Corporation of a guarantee of interest to a further amount of two or more per cent. upon the bonds of the company up to not more than three hundred thousand dollars the Government may make such arrangements for permitting the said Corporation to share any security taken by them for advances hereunder, and such provisions as to the manner of holding the same as to them seem fi

AND WHEREAS, the Company have applied to the Government to give such guarantee as aforesaid of interest on the sum of three hundred thousand dollars ($300,000.00) for a term of twenty-five (25) years, at the rate of two per cent. (2 per cent.) per annum, and agreed in consideration of such guarantee to pledge its undertaking and its said tolls and property as security thereof, which the said Government has agreed to do and to accept.

AND WHEREAS, similar application has been made by the Company to the Corporation to guarantee the interest to a further amount of three per cent. (3 per cent.) upon the Company's bonds up to not more than three hundred thousand dollars ($300,000.00) which the Corporation have agreed to do but subject, nevertheless, to ratification by the ratepayers of the City of Victoria in manner prescribed by section one hundred and eleven (111) of the Municipal Act, 1892.

NOW THIS AGREEMENT WITNESSETH, that in pursuance of the premises it is hereby agreed by and between the several parties hereto, as follows, viz:—

1. The Company shall commence the construction of their said intended railway on or before the first day of October, one thousand eight hundred and ninety-two, and in default of so doing this agreement shall be void and of no effect.

2. The Company shall within ninety days (90) after the date hereof proceed to issue the whole of the bonds authorized by the said Act of Incorporation, payable in twenty-five years from date, bearing interest at five per cent. per annum, but not to exceed in the whole the sum of three hundred thousand dollars ($300,000.00), such bonds to bear coupons for the half-yearly payments of the interest thereon, which bonds, subject to the provisions of section one (1) and two (2) of the said "Victoria & Sydney Railway Subsidy Act, 1892," shall bear the following endorsement, which endorsement shall be signed by the Minister and the Mayor for the time being of the City of Victoria, and be counter-signed and sealed by the Clerk of the Corporation. "The payment of the interest but not the capital of this bond at the rate of two per cent. (2 per cent.) per annum half-yearly on the first days of March and September in each year is undertaken and guaranteed by the Government of the Province of British Columbia for twenty-five years from the first day of September, A.D., 1892, to the first day of September, A.D., 1917, and the further payment of interest but not the capital of this bond at the rate of three per cent. per annum on the days and for the time aforesaid is undertaken and guaranteed by the Corporation of the City of Victoria.

3. The Government and Corporation shall guarantee in manner aforesaid the payment of the interest on the bonds so agreed to be issued as aforesaid in the proportions and at the times aforesaid, and the signature of the "Minister" and the Mayor, respectively, to the coupons may be affixed by printed, stamped or lithographed fac-simile.

4. The work of construction shall be placed in charge of a competent engineer or engineers selected by the Company, and approved of in writing by the Chief Commissioner of Lands and Works on behalf of the Government, and by the Mayor of the City of Victoria on behalf of the Corporation, and the Company may remove such engineer at pleasure and appoint another engineer, subject also to the same approval.

5. The aforesaid bonds, when issued, shall be handed by the Company to the "Minister," who shall have them duly noted in a book to be kept for that purpose, and immediately upon completion of such noting he shall deposit the bonds in one of the charter banks carrying on business in Victoria, to be approved by the parties thereto.

6. The Company shall negotiate the sale of their said bonds as soon as possible after their issue, having due regard in disposing of them to the best advantage, and may, with the approval of the Minister and Corporation, employ such agent or agents as they may deem proper.

7. The proceeds of the sale from time to time of the said bonds shall be deposited in one or more chartered banks in the City of Victoria at interest to a special account in the name of the said Railway Company, and shall be drawn out by cheques of the Railway Company, but no such cheques shall be paid by such bank unless attached thereto is a certificate of the engineer of the said Railway for the time being, countersigned by the City Engineer and by the Surveyor General of the Province, specifying the nature and character of the work, supplies, materials or other expenditure for which such cheque is given, and such certificates shall be retained by such bank.

8. All moneys paid by the Government of British Columbia and the Corporation respectively in respect of the aforesaid guarantees shall be considered as a debt due from the Company to the said Government and Corporation respectively, and shall be taken and considered and are hereby made a charge upon the undertaking, and the tolls and the property of the Company real and personal now existing or any time hereafter acquired, and the Minister of Finance and Agriculture for the time being shall be held and deemed to be a mortgagee or incumbrancer upon the said property in trust nevertheless as to two-fifths thereof for the Government of British Columbia and as to three-fifths in trust for the Corporation.

9. The company shall upon demand made by the said Minister execute to him a legal mortgage of all the aforesaid property of the Company as security for the repayment of all moneys paid by the said Government and Corporation respectively in respect of the said guarantees and the costs, charges and expenses they may be respectively put to, or incur in connection therewith, and the said Minister shall hold the said Mortgage and all other securities, if any, of the Company which may come into his hands and the moneys thereby secured in the proportion and upon the trust hereinbefore mentioned and declared, and which said mortgage shall contain all the covenants, powers and conditions usually inserted in mortgages of real and personal property together with the additional power of sale in default of the Company operating their said Railway for a period of three months, whilst any moneys shall be owing by the Company to the Government or Corporation respectively in respect of the said guarantees.

10. The said Company hereby agree to complete their said Railway on or before the first day of September, one thousand eight hundred and ninety-four, and thereafter to continually maintain and operate the same so long as any of their said bonds shall remain unredeemed within the said period of twenty-five years.

11. Provided always that Chinese shall not be employed in the construction of the said railway, and provided also that in case a by-law to ratify this agreement on the part of the Corporation shall not be submitted within sixty days from the date hereof for the vote of the ratepayers, under section one hundred and eleven of the said Municipal Act, 1892, or if such by-law shall be submitted and shall be defeated at the polls, or shall not be carried, then, and in such case, this agreement and everything herein contained shall be void and of no effect.

12. The Company shall not pay any dividends to any shareholder, or other person, so long as any moneys remain due or owing to the said Government or the Corporation of the City of Victoria, in respect of the said guarantee.

13. The books of the Company shall be open to the inspection of any person authorized to inspect the same by either the said Government or the Corporation of the City of Victoria, at all times.

14. The Company shall operate and run over the said line of railway when constructed at least one train each way per diem (Sundays excepted) for the whole length of the railway.

IN WITNESS WHEREOF, the Victoria & Sidney Railway Company and the Corporation of the City of Victoria have hereunto respectively set their corporate seals, and the said Minister has set his hand and seal the day and year first above written.

JULIUS BRETHOUR,
President.

[L. S.] ROBERT IRVING,
Secretary Victoria & Sidney Railway Company.

ROBERT BEAVEN,
Mayor of the City of Victoria. [L. S.]

J. H. TURNER,
Minister of Finance and Agriculture.

Passed the Municipal Council the 5th day of July, A. D. 1892.

TAKE NOTICE

That the above is a true copy of the proposed by-law upon which the vote of the Municipality will be taken at Burnes' building, Bastion Square, for the Centre Ward; at the City Hall, corner of Pandora and Douglas streets, for the North Ward; and at a building situated on the east side of Government street, between Broughton and Courtenay streets, and known as No. 27, for the South Ward, in the City of Victoria, on Wednesday, the twentieth day of July instant, and that the poll will be kept open between the hours of eight o'clock, a. m. and four p. m.

WELLINGTON J. DOWLER,
C. M. C.

AN UNFORTUNATE INCIDENT.

The TIMES is very unwilling to criticize the actions of any of the health authorities, inasmuch as criticism tends to shake public confidence, and it is very important that the public should at this juncture be fully assured as to the wisdom of the course which the authorities are pursuing. We should be very sorry to see any relaxation of vigilance or a disposition to rest satisfied with what has been done, although we believe the worst of the trouble is over. We also believe that it would be well to have all the patients removed from their residences in the city to the quarantine hospital. But the danger is surely not so great as to warrant the extreme measures that were taken in the case of the young man McKay, who died in the hospital last evening immediately after his removal. If a patient's life is to be endangered by his removal, humanity ought to suggest that he be left where he is for a time. And if the feeling of humanity is not to influence those in charge of this business, they should remember that cases of this kind will be certain to create a prejudice against the hospital and the authorities in the public mind. That is an evil that should be avoided by all means. Any person can see that if the friends of patients form the impression that they are at all likely to receive rough treatment at the hands of the authorities, there will be efforts made to conceal them. So, leaving considerations of humanity aside, expediency bids us avoid the occurrence of such incidents as that of yesterday. It is certainly advisable that all cases should be placed in the hospital, but we are very much afraid that this object will not be furthered by yesterday's display of force. It was in every sense a most unfortunate occurrence. The provincial authorities must learn to strike the golden mean between undue mildness and undue severity, or else they will do untold mischief. It cannot be too clearly kept in mind that the confidence of the public should be secured and retained; that is the central idea in Mayor Beaven's plan of proceedings, as shown in his letter published yesterday, and the case of the unfortunate McKay came with singular promptitude to bear out the Mayor's position.

VERY GREAT GOODWILL.

The Vancouver papers insist that they and the people of their city are filled with goodwill towards Victoria and sorrow for her "affliction." It appears to us that there is a considerable air of hypocrisy about their professions, while their own columns contain malicious falsehoods concerning the smallpox outbreak here, and while their authorities are trying every unfair means to keep people from Victoria setting foot on the Mainland. For instance, the World on Thursday commenced a column or so of Billingsgate with the assertion that the smallpox is "practically epidemic" here, a malicious and wilful falsehood. It further seeks to create the impression that the disease has been prevalent in Victoria for something like two months, though it must know that this is not a fact. There were two cases here in May, due to infection in Vancouver, and none were known from that time until after the 1st of July. It is quite certain that the present outbreak did not spread from the first two cases, but was due to a second importation of the disease, probably from Vancouver. The rapidity with which the cases increase suggest that a number of persons were exposed to contagion from some common source, but there is not the slightest evidence that such source was connected in any way with the two cases of last May. The length of the interval between the two outbreaks is, on the other hand, very strong evidence against the supposition. The Vancouver papers also show their goodwill to Victoria by repeating the story they invented regarding the Phra Nang, although they cannot produce the slightest confirmation. They know, in fact, that they are repeating a malicious lie. In face of their deliberate slanders and falsehoods their professions of "sympathy" are nauseating. Nor is the case made any better by the attempts of the press and the people to make believe that the quarantine was undertaken with reluctance and is maintained only under a sense of necessity. They have said themselves that quarantine would not have been declared only for the fear that the Sound cities would otherwise have quarantined all British Columbia. But the Sound cities have already quarantined all British Columbia as effectually as they can, so the excuse no longer holds good, and if the Vancouver people are not acting from spitefulness they will return to the position which they took before this excuse was put forward. They know themselves that they are not warranted in going beyond the Government quarantine regulations, and they would not do so if they were actuated by right motives. It is outrageous that a person wishing to go from Victoria to any point in the East should be stopped at the sweet will of Vancouver. Victoria can get along very well without "sympathy," what she wants is bare justice, and that she must have.

EDITORIAL NOTES.

The Colonist the other day said that the Vancouver World was an "idiotic sycophant." This morning the Victoria paper "goes one better" and describes its Vancouver political colleague as a "blatant liar." The two papers are ardent admirers of Premier Davie, whose opinion of both has been publicly expressed in two words— "——fools."

Premier Davie's political enemies can say a good many things against him politically, and they can prove, and have proved, that he is unfit to lead a government. But they cannot charge him with sycophancy or toadying. He is a purchaser of that commodity, and his most recent acquisition, which was secured very cheap, is rather a proof of his ability to discriminate in making a selection. The organ that cursed him yesterday is singing peans of praise to him to-day. Great is toadyism!

The Sound cities are in a dreadful state of funk over the smallpox. If a Seattle man goes to Tacoma he must show his arm, and if there is no vaccination mark thereon the medical officer at once supplies the deficiency. Tacoma people have to go through the same ordeal when they visit Seattle. The men are vexed and bothered by the process, but the ladies are even more troubled when politely asked by the health officer to show their vaccine marks. The reason for this in a good many cases appears to be that the marks are not on their arms, and further, that the ladies do not want marks on their arms. At both places even the name of Victoria is fumigated before it is allowed to come within the city limits. So it is in all places on the Sound; the people seem to have scared themselves into a mild fit of insanity.

Le Canadien, Mr. Tarte's paper, has a special commissioner at work investigating the French-Canadian exodus, and recently his first report appeared in its columns. The letter is dated from Trois Pistoles. The population of the parish is about 2800. The farmers have exceptional advantages in other ways, but they have no market, says the writer, and whole families leave for the New England States every spring, having no means to live. As a rule, before leaving, they sell their farms to the village merchant with whom they run into debt. Twenty years ago there was a flourishing village at the Trois Pistoles River with about 300 families, one-third of whom were farmers. Now there are not more than 25 families, and all the rest have emigrated. The commissioner is pretty certain to find a similar state of affairs in a good many of the other parishes. Quebec province is far from flourishing under the beneficent reign of the N.P.

EXPLANATION.

TO THE EDITOR:—In referring to a case of smallpox found on Yates street, which was referred to the other day, it should have read "taken from Yates street in front of Steitz restaurant, instead of from Steitz restaurant." The fact is that no cases have been found at Steitz restaurant or in that locality. This explanation is necessary, in order that no misapprehension may result.
G. L. MILNE,
Health Officer.

AMERICAN VACCINE.

TO THE EDITOR:—With regard to the items in the TIMES re vaccine, we wish to say that you are doing an injustice to the American vaccine farms, and to those who are doing their utmost to get a supply of that much desired article. Thes farms are under the inspection of the U. S. boards of health and none but pure lymph turned out. The first lot of vaccine obtained was from the Sound ports, and we understand some also from Vancouver and Westminster, and may have been old. Vaccine is not guaranteed after three weeks old. This no doubt is the cause of some being inert. The present supply is coming direct from Omaha and Boston farms.
Yours truly, LANGLEY & Co.

PRECAUTION NOT COWARDICE.

TO THE EDITOR:—It is to be hoped that Christian people will act on Dr. Milne's suggestion to have only one service at the churches until the worst of the outbreak of smallpox is over. Although the total number of cases has not been over about one in every four hundred inhabitants, the death ratio has been one in about every eight persons infected! When we have the Salvation Army, the theatres, societies, etc., refraining for the present from holding public gatherings, is it too much to ask Christian people (who would not allow their children to attend Sunday Schools) to avoid the risk of contagion from contact with strangers when crowding in and out of churches. No one indeed can say that we know we have not the disease incubating in our bodies, and we can carry it home on our clothes to our families. Doubtless in making his wise suggestion, Dr. Milne preferred "suggestion" to making, in his capacity as health officer, a compulsory order for the regulation of church services. The yellow flag has been up in close proximity to almost all our cathedrals and churches, and doctors are unanimous in agreeing that infection can be carried some distance through the air. The writer has conversed recently with medical men on the question of attendance at church, etc., and has received but one opinion—that for the present, until all cases are out of the city and none in course of removal, it were far better to avoid public gatherings or crowded buildings. Those of us who have within us a knowledge of God's goodness can worship and praise Him in our homes, where we can, and I trust do, pray that He will give us wisdom to devise means to stamp out the disease, *and take sanitary measures to prevent its return.* We require stores to provide the food God has furnished to support our bodies, "which are the temples of the Holy Ghost," but for a little time we should *worship at home.*
PRESBYTERIAN.
Victoria, July 14th, 1892.

THE BOSS SECTION GANG.

Railroad Laborers Among Whom Were a Doctor, a Preacher and a Coroner,

Pittsburg Post: Superintendent Elliot Holbrook, of the Baltimore & Ohio road, in the course of an interesting chat, said he did not believe any road in the country could turn up, like the Baltimore & Ohio, a section gang with a county coroner, a doctor of divinity, an ex-member of the legislature and an emergency physician. He has been out along the line for a week, and tells a story about an experience he had while his car was lying at Sand Patch a night or two ago. The foreman of the gang came up to him and said:

"There is more talint to the square inch in that gang on the fur side of that mountain than I have met with since I was at the last Democratic State convention."

Mr. Holbrook asked the man what he meant and the foreman continued:

"I was coming up the hill from work with my gang a bit ago, and when a few rods below Philson's we found the body of a man lying beside the track. His body was yet warm, and I said, 'I wish I had a doctor here,' said I half to myself.

"'I guess I can answer in a pinch,' said one of the men of the gang.

"'What do you know about such things?' I asked, with some show of contempt.

"'O, I took a term in the old Jefferson Medical College years ago, but didn't take no practice and quit.' All this time he had been rummaging the body, and in a minute said: 'He's dead.'

"'Well, I'll leave two or three of you here to watch the body while I get a coroner or a 'squire to hold the inquest,' said I. 'The rest of you come with me.'

"'I guess, as I am Coroner of the county, I'll do,' said another mud-covered citizen.

"'You!' said I to him.

"'Oh, yes; I was elected last fall.'

"'Well, go ahead.' He took six of the gang and held an inquest, and returned a verdict of accidental death.

"'Well, that's done; put him in the handcar, and we'll take him up and get a coffin, and a preacher, and bury him,' I said to the men.

"'What's the use?' said a man of the gang who hadn't said a word till now. 'I am a minister and always have a Bible with me. Let's hold the service right here. Let the others dig a grave up there under that big hemlock, and we'll bury him without further trouble.'

"Acting on this suggestion the grave was soon dug, the body carried to its side, and then the 'minister' took hold. He read a chapter, gave out a hymn, as he called it, which the men sung, and then he delivered one of the most feelin' an' appropriatist funeral sermons ever heard. It was out of sight, and nearly every one of us was putty moist before he quit. There wasn't nothin' in it all resemblin' my church, but it caught me, 'cause it was simple and as powerful as the dynamite we had been using all day.

"Like the doctor, the gospel fellow had had his innings in a school and seminary, but a woman scrape or a Parkhurst expedition had downed him, and he was unbeknownst to himself doing really big now. What struck me all of a heap was the fact that I, who was bossin' the gang, could only 'touch the pen' to make my signature on the pay-rolls, and all the fellows under me were either M.D.s, D.D.s, or D.B.s. Great country this!"

VICTORIA B. C.

RE-ASSURING REPORTS.

(Continued from page 1.)

not appear to feel at all uneasy and took charge of the Yosemite as usual this afternoon. He left for Vancouver with the Yosemite about 3 o'clock this afternoon.

Captain Irving's Opinions.

Captain John Irving, manager of the C.P.N. Company, was interviewed by a representative of the TIMES this afternoon, and the captain gave his opinions of the trouble at Vancouver between the steamer captains and the authorities as follows:

"To what do you attribute the trouble at Vancouver, captain?"

"To a gentleman named A. St. G. Hamersley," replied Captain Irving promptly.

"Who is he?"

"He is city solicitor of Vancouver, president of the Union Steamship Company, of Vancouver, and hostile to the C.P.N. Company."

"Has he any other grievance against the company?"

"I think he has," replied the captain dryly; "I think he has a personal grudge against Captain John Irving, who thinks a good deal less of Hamersley than Hamersley thinks of Irving."

"Do you think that a person acting as a city solicitor should occupy any other position, such as that of representative of a steamship company?"

"Certainly not. The city solicitor of any city should be without prejudice, and the person to occupy such a position should be quite independent of any private interests."

"What about the Vancouver people in this matter?"

"There can be little doubt, from information received by this company, that the people of Vancouver generally took a reasonable view of the circumstances, and our company was informed by wire through an authentic source that the regulations would be carried out and the passengers allowed to land under inspection."

"Were they allowed to land under the regulations drawn up by the Lieut.-Governor-in-Council?"

"They were not. The health officer and other authorized persons refused to obey the regulations to examine passengers. They treated the mandate of the court and the regulations with contempt, and in my opinion simply outlawed themselves.

"What do you intend to do under the circumstances?"

"We intend to run our steamers as usual, and as long as we comply with the law, any damages the company may suffer we shall expect the parties who interfere with our legitimate business to make good. The steamer Yosemite will leave this afternoon at 2 o'clock. To-morrow no steamer will leave here unless obstacles are placed in the way of the Yosemite returning, in which case the steamer Islander will leave with freight and passengers.

Free Board.

The people of Vancouver being in a generous mood just now, Capt. Irving of the C. P. N. Co. proposes to assist them in their charitable intentions. He offers to carry as many people to that city as care to go, and will give them a free meal besides. When they get there Vancouver will board them two weeks for nothing.

Dr. Davie's Report.

The following report has been issued by the Provincial Health Officer:

PROVINCIAL HEALTH OFFICE.
MIDNIGHT, July 15, 1892.

Nanaimo—No new cases in the city or district.

New Westminster—The health officer yesterday reported two cases in the city and two in the district. To-day I received a telegram from him as follows:

"Two convalescent Chinamen found here last night."

The inevitable inference is that the two convalescents have been in New Westminster or vicinity during the whole course of the disease, undiscovered by the authorities.

Vancouver—Report of health officer states one new case, making a total of six in that city.

Victoria—There are 55 cases reported located as follows: Albert Head Quarantine Station, 13; Jubilee Hospital Quarantine Station, 36; city proper, 6. One new case was discovered to-day, a colored man named Gant, who was immediately removed to the Jubilee Hospital Quarantine Station. Two deaths have occurred, one at Albert Head and one in the city proper.

On my visit of inspection to the Jubilee Hospital Quarantine Station, I found things thoroughly organized, and every attention being paid to the comfort and treatment of the patients by the efficient staff. Dr. Richardson and the matron stated to me that the convalescent patients were in need of fresh fruit, and that newspapers and books would be particularly welcome to the older patients; also that picture books, etc., would be a boon to the little ones under their charge. I am sure I have only to draw the attention of the citizens to this matter to have a plentiful supply of these articles forthcoming.

Mayor Beaven has failed to provide a building for "suspects," in spite of my urgent request for the same. This class of people will be a continual menace and danger to the inhabitants of Victoria. Without there is isolation we cannot hope to stamp out the smallpox. I have now the assurance that if the Mayor will not act, the Provincial Government will supply the building to-morrow.

Dr. Wade and Dr. Watt, Jr., personally superintended the removal of patients from the city to the Jubilee Hospital Quarantine Station. (Sgd.) J. C. DAVIE, M.D.

Delayed Mails.

There is said to be a quantity of mail for this city lying at Vancouver, which was not brought over from there on account of the late unpleasantness between the steamer captains and the panic-stricken officials at the Terminal City. Those who have been up there say it is very strange to see the state of mortal terror displayed by strong robust men as soon as smallpox is mentioned, or a Victoria boat comes in. Men who are courageous enough in almost everything else show the most abject cowardice in Vancouver when anything relating to smallpox is brought up. There being so much of the disease in that town may account for this.

Correction.

Health Officer Milne desires to correct a statement made the other day, that a patient had come from Steitz's restaurant. The case in question did not come out of the restaurant, the name being used simply to indicate the place on Yates street where the man was seen.

Value of Vaccination.

The following statistics as to the value of vaccination were compiled by Dr. Thresh, medical officer of health for Chelmsford, and based on a report on the late Sheffield epidemic of smallpox by an inspector of the local government board. By this statement it appears that out of every 1000 unvaccinated children under 10 years, 101 were attacked; out of every 1000 vaccinated, five only were attacked. Unvaccinated children are therefore 20 times more liable to attack than vaccinated. Out of every 1000 unvaccinated persons over 10 years, 94 were attacked; out of every 1000 vaccinated only 19 were attacked. Over 10 years of age, therefore, unvaccinated persons are five times more liable to attack.

Out of every 100 unvaccinated children attacked, 44 died; out of every 100 vaccinated children attacked, only two died. A child under 10, who has not been vaccinated, therefore, is not only 20 times more liable to be attacked, but the attack is 22 times more liable to end fatally. The danger of an unvaccinated child dying from smallpox during an epidemic is more than 440 times as great as that of a vaccinated child. Out of every 100 unvaccinated persons over 10 years of age attacked, 54 died; out of every 100 vaccinated over 10 years of age attacked, only five died. Therefore, unvaccinated persons over 10 years of age are not only five times more liable to attack by smallpox, but 11 times more liable to die, if attacked. The danger of such a person, if unvaccinated, dying from smallpox during an epidemic, is 55 times greater than that of a vaccinated person.

FROM VANCOUVER.

Dinner to D. E. Brown—J. M. Spinks and R. G. Mackay Still at Large.

VANCOUVER, July 16.—About 60 prominent citizens, principally C.P.R. officials, attended the banquet to D. E. Brown last night. Several souvenirs were presented, one a gold-headed cane. The dinner was given at the Hotel Vancouver. Mr. Brown leaves to-morrow on the Empress for China, Japan and Australia on a six months' trip.

The Yosemite did not arrive to-day. The mails are being sent by way of Nanaimo. It is said that passengers have been transferred to Fraser river boats and will be landed at New Westminster. Nothing new to-day; all quiet.

Arrangements were made last night for a horticultural exhibition on Aug. 2nd and 3rd. A poultry, produce and dog show is talked of to take place at the close of the circuit fall fairs.

Last night the Trades and Labor council decided to be represented at the congress, Toronto. Steps were taken to form a provincial trades assembly.

It is reported here that the new case of smallpox at Westminster was one of the passengers landed at Port Moody by the Yosemite. J. M. Spinks and R. G. Mackay are still at large, although warrants are out and they are known to have been in the city. Spinks and two boys are rusticating in Hastings.

Another case was developed here last night, and two in New Westminster. One man was discovered walking between Port Moody and Westminster, badly affected, who is supposed to have arrived by the steamer from Victoria.

The writ of habeas corpus argument at Westminster was postponed until Tuesday.

The non-arrival of the steamer and mails from Victoria inconvenienced business men.

Notes.

"Mike" McCahill this afternoon burnt a lot of coal tar and sulphur at Spratt's wharf.

Mr. R. Butler requests the TIMES to say that Mrs. R. Butler has not got the smallpox.

There will be no services held to-morrow in the Y.M.C.A. rooms owing to the present trouble.

The remainder of the cases in the city are expected to be in quarantine before next Wednesday.

One of the men who had been nursing the late Mr. Waitt had the effrontery to board a Fort street car just after coming from the sick room. He was promptly ejected.

In justice to their fellows everybody who has come in contact in any way with a person known to be afflicted with the smallpox, should spare no pains to prevent others from taking the contagion from them. Even the burning of a suit of clothes is not so great a loss as one human life. So says one of the city doctors.

PERSONAL.

Movements of Well Known People in Various Directions.

Capt. Roberts, of the City of Kingston, is in the city.

Master Earle, son of Thomas Earle, M.P., returned from Toronto, where he has been attending school, on a visit.

Mrs. J. S. Richards came up from San Francisco yesterday to visit her husband, the chief engineer of the San Pedro.

WHARF AND WAVE.

Jottings of Interest to Marine Men Concisely Compiled.

Captain N. Clements is in charge of the North Pacific.

Steamer Rainbow left for New Westminster this morning.

The Lottie goes to Departure bay on Monday with scows for coal.

The sealing schooners in port are getting into their winter quarters.

Steamer Islander arrived from Vancouver at 4 o'clock this morning.

Capt. Petty and family and Mr. Flett and family leave this evening on the steamer Mischief for Peddar Bay, where they will camp for a time.

Steamship Empress of India will not call here to-morrow on her way out. The mails will go over to Vancouver to-night. There are no passengers.

Steamer North Pacific, which is on the Sound route in place of the City of Kingston, will not remain over here to-morrow. She will arrive at the usual time this evening and then return to the Sound, where she will remain to-morrow.

Disinfectants.

Use Carbo-Napthazone for disinfecting purposes. For sale by Langley & Co., 21 and 23 Yates street. *

Vaccination by a doctor at Atwood's drug store, 68 Douglas street. *

THE CITY AND DISTRICT

Sheffield cutlery at Fox's, 78 Government street.

Newcombe Pianos.

Tone pure, sweet, brilliant, powerful. Kerr & Begg, 45 Government street. *

B. C. Medical Council.

The report of the British Columbia Medical Council for 1892 has just been issued, and contains much information of an interesting character for the profession. The list of officers elected in May last is given.

Nothing Definite.

Although several dispatches have been sent to Marcus, Spokane and other points nothing definite has yet been heard of Mr. Morris Moss, who was reported missing in last night's TIMES. After leaving the railway there is about 50 miles to go on horseback to Rock Creek, where Mr. Moss was bound for.

Well Deserved Promotion.

Mr. E. Haughton, who for several years has been day clerk at the C.P.R. Telegraph office, has been promoted to assistant night operator. The operators are being kept busy, a great deal of business being done by wire which is usually done by letter. Numerous dispatches are also received containing enquiries about friends and relatives.

Bribed With Whiskey.

The Indians and white traders of the west coast have informed a couple of the sealing captains that the officers of the United States revenue cutter Corwin supplied them with liquor when the Corwin was up there in the spring in search of evidence in regard to the sealing business. It is alleged that one white trader was first loaded with whiskey and then induced to sign a paper. What was on the paper no one knows.

It Would Apply to Them All.

The majority of the canoeing fraternity were slightly agitated after reading the item in the TIMES last night referring to the capsizing of a canoe out by the San Pedro the previous evening. Almost every man who runs a canoe thought the item referred to him because it stated that the craft was one of the handsomest canoes owned in the city—one, by the way, which generally carries good-looking ballast. Had it been stated that the canoe was tubby and was never even known to carry a cargo of beauty, no paddler would have accepted it as a personal allusion. It would mean that other fellow, certainly.

Newsboys' Union.

The newsboys, all of whom are of tender age and diminutive stature, have become imbued with the idea that a union is the one thing needful to make them supremely happy and prosperous. A very little chap named Glover, well know on the streets as one of the most enterprising of the profession, and who is about "knee high to a grasshopper," was busily engaged to-day in organizing the boys. He said that the membership would be limited to 25 and that only members would be permitted to sell papers. The union would have a room for meetings, and the members would wear a uniform. Captain Maxil has been chosen as the leader. The organizer explained that the union was being organized solely for self-protection and not with a view to declare war upon the newspapers.

The Methodist College.

The trustees of the B.C. Methodist College have decided on renting the Chamberlain building, New Westminster. A committee of New Westminster citizens has raised $800 towards equipment and running expenses for the first year. Rev. W. G. Mills, B.A., and Dr. Boggs have agreed to act as auxiliary teachers. Gunner J. C. Cornish formerly of C Battery, has offered to act as drill sergeant and the directors of the Y.M.C.A. have offered the use of the gymnasium for calisthenics. The building selected is close to Moody Square, which can be used as recreation ground. Prof. Whittington, the principal, has been telegraphed to to secure the best available lady as lady principal. It is expected that the college will be open for pupils on the 1st of September. A guarantee has been received from New Westminster of ten day pupils. The final location of the college will be made next May.

New Vancouver Coal Co.

The shareholders of the New Vancouver Coal Mining and Land Company, Limited, held their ordinary general meeting, on June 14, at the offices, 12 Old Jewery Chambers, E.C., Mr. John Galsworthy presiding. In moving the adoption of the report, the chairman said that the output of coal last half year amounted to 204,890 tons, against 253,000 tons for the previous half year. The sales in the half year under review were 202,350 tons as against 254,000 tons in the previous six months; 50,000 tons of the coals sold during the last half year were disposed of locally, and the residue was sold in San Francisco. The net output from the East Field Mine in the half year was 63,000 tons; from No. 2, South Field Mine, the output was 79,452 tons, and from No. 3 South Field Mine the net output was 16,598 tons. During the half year the quantity of New Wellington coal extracted from the Northfield Mine was 45,728 tons. The result of that large output of coal was a net profit of nearly £7800. That, of course, was extremely unsatisfactory for such a large output; but the prices that ruled at San Francisco and the Island during the whole of that year were very low. They would observe by the report that the board had resolved to issue £20,000 worth of debentures at 6 per cent., for which the board would be glad to receive applications. The directors recommended the payment of a dividend of 1½ per cent., which, with the interim dividend paid in December last, made 4 per cent. for the year. No doubt some of the shareholders would consider that dividend small; but the board thought that in view of the company's indebtedness to its agents, and prospects of the company's operations for the current year, they were unable to recommend a larger dividend. Mr. J. Fry seconded the motion which was adopted.—Nanaimo Free Press.

Smallpox.

Disinfectants of all kinds may be obtained at Geo. Morison's, 55 Government street. Pocket preventatives a specialty. *

WHY WORK WAS STOPPED.

The Wind Interfered With the Dredge at the Outer Dock.

"Why was dredging stopped in the outer harbor?" the question asked in the House of Commons several weeks ago, has been repeated around the streets during the last few days.

When Mr. R. P. Rithet was asked the question this morning, he answered that he stopped the work as it was impossible to do it profitably while the presently winds were blowing. During the last two months that work was prosecuted the dredge could only work eight days.

The dredge will be put to work again in August and work will be continued for three months, when the weather is expected to be favorable. There is no hurry about going on with the work, said Mr. Rithet, as the channel is now deep enough for the C.P.R. steamers to dock if the company wish them to do so.

THE COQUITLAM.

News Brought by the Islander, Which Arrived To-Day.

The steamer Islander, which arrived from Alaska this morning, brings the latest news from Sitka concerning the seizure of the Coquitlam. Captain Irving and J. C. Keith visited Captain McLellan on board the Coquitlam just before sailing. The latter was then waiting for the American authorities to appraise his vessel and cargo and he and his crew were enjoying themselves fairly well under the circumstances. A letter was brought down from Capt. McLellan to the U. S. S. Co., which stated that an appraisement was being made of the steamer and cargo, which would be sent down on the steamship Queen, which leaves for Alaska at the beginning of next week. The appraisement had not been concluded when the Islander left, so that the amount of bonds required for the steamer's release could not be ascertained. Capt. Webster, however, stated that the company intended to send up sufficient to cover appraisement by the Queen so the Coquitlam could be released immediately.

Beauty and Comfort.

Women know how much comfort and health conduce to comeliness of person. To men beauty does not seem to call for analysis. If a woman imagines she cares more for beauty than for comfort and health, it is because she does not see that beauty is impossible without both. A Rigby Waterproof cloak is conducive to health and productive of comfort, and at the same time may be in itself an adornment to the person of the wearer. Rigby is now for sale in over two hundred designs in Ladies' mantle cloth, as well as it Gentleman's overcoats.

It is at the same time stylish, comfortable, sanitary and waterproof.

CHURCH NOTICES.

Services in the Different Churches To-Morrow Morning and Evening.

Services will be held in First Presbyterian church to-morrow morning and evening as usual.

Pandora Avenue Methodist Church—The usual services will be held in the Pandora Avenue Methodist Church to-morrow, morning and evening, conducted by Rev. C. Watson, pastor.

St. Andrew's, R.C., Pro-Cathedral—There will be services in the evening, and the morning services will be made as short as possible.

Centennial Methodist Church, Gorge road—Service will be held to-morrow at usual hours, 11 a.m. and 7 p.m. The pastor will preach.

BAPTIST CHURCHES.

The services will be held at both Calvary and Emmanuel churches to-morrow, both morning and evening. The Sunday school service in the afternoon will be omitted. Rev. P. H. McEwan will preach at Emmanuel.

CHURCH OF ENGLAND NOTES.

The following are the preachers in the churches to-morrow:

Christ Church Cathedral—At 8 a.m., Holy Communion; morning, the Rev. J. B. Hewetson; evening, the Rev. Canon Beanlands.

St. James' Church—Morning and evening, Ven. Archdeacon Scriven.

St. John's—Morning and evening, the Rev. Percival Jenns.

St. Barnabas—Morning and evening, the Rev. G. W. Taylor.

St. Saviour's—Morning and evening, the Rev. W. D. Barber.

St. Paul's, Esquimalt—Morning, and evening, the Rev. S. C. Scholefield.

St. Mark's—Morning, the Lord Bishop; evening, the Rev. W. H. P. Arden.

St. Luke's, Cedar Hill—Morning, and evening, Rev. M. C. Browne.

Cadboro Bay—Afternoon at 3.

Provincial Jail—Morning, at 9:30.

Indian Reserve—Afternoon at 3:30.

Jubilee Hospital—Afternoon at 2.

The Lord Bishop of Columbia will celebrate Holy Communion at St. Mark's church to-morrow morning after the midday service at which he will also preach.

It is True.

If it is not right do not do it, if it is not true do not say it. In buying the Bush & Gerts piano you do right. It is true to say it is the best piano offered for sale in this market. Agency, 37 Fort street. *

30 BROAD STREET.

KASLO CITY

KOOTENAY LAKE.

SINCE the opening of navigation many hundreds of people have poured into Kaslo City. The discoveries of last fall have proved as rich as expected, and many new ones, fully as important, have been located this spring. The Kaslo-Kootenay Land Company have built roads and trails into the important mines, and surveys have been completed for the railway. The contract for clearing the right-of-way for the latter will be let in a few days. Many substantial buildings have been erected so far this year, and a large number will be begun immediately, including a handsome hotel.

A large number of business and residential lots have been sold, and many have changed hands at a good profit. In a short time the Company will advance the price of all lots.

Now is the Time to Invest.

For prices, terms and full particulars, apply to the undersigned.

SHORT MEN.

Small of Stature But Large of Brain and Prominent Actors.

Philip Kent: Confucius was a man of middle height. We should have preferred him short. But one must not rob a man of his inches to fit a theory. Socrates was stumpy; also St. Paul, and Alexander the Great, great only as a warrior. In stature both he and his far more intellectual father, Philip of Macedon, scarce reached middle height. In this regard we may rank them with the famous Spartan General, Agesilaus; with Attilla, "the scourge of God"—broad-shouldered, thick set, sinewy, short; with Theodore II., King of the Goths, of whom Cassiodorous writes:

"He is rather short than tall, somewhat stout, with shapely limbs, alike lithe and strong." Æt'us, too, commander-in-chief of the Roman troops, and prop of the tottering Roman Empire in the days of Valentinian, was a man of low stature; therein resembling Timour the Tartar, self-described as a "puny, lame, decrepit little wight, though lord of Asia and terror of the world;" also the great Conde and his pigmy contemporary Marshal Luxembourg, nicknamed the Little by those who admired him for making Louis the IV. Louis the Great; who, by the by, less his high-heeled shoes and towering wig, dwindles to about five feet six. But even thus pared down to the inches nature gave him, he was a giant compared with Sir Francis Drake and with Admiral Keppel—"Little Keppel," as every sailor in the fleet fondly dubbed him from pure love and admiration.

Whereby a tale, if but to break the jog-trot of this catalogue. When, then, Keppel—a Commodore at 24—was sent to demand an apology from the Dey of Algiers for an insult to the British flag, he took so high a tone that they exclaimed against the insolence of the British King for charging a "beardless boy" with such a message to him. Replied the beardless boy, "Were my master wont to take length of beard for a test of wisdom he'd have sent your Deyship a he goat."

Oliver Cromwell, Claverhouse and Mehemet Ali must be content to take it out in brains, for they all lacked inches. Two of these great names naturally suggest that of another famous soldier and usurper, Napoleon Bonaparte. Le Petit Caporal, as his men lovingly called him, stood about five feet one and three-quarters English. In stature the Iron Duke beat him about six inches, while the five feet four of Nelson place him midway or thereabouts between the victor and victim of Waterloo. And I might go on with the names of Shakespeare, Michael Angelo, Richard Savage, Byron, Cooper, Cervantes and a host more.

Homestead Cooks and Waiters Strike.

HOMESTEAD, Pa., July 15.—The cooks and waiters in the hotel where the staff officers of militia have been getting their meals to-day concluded to show their sympathy with the strikers by refusing to serve meals to the officers. Gen. Snowden had to go to headquarters and get breakfast in camp. The entire force of assistants to the civil engineers in the employ of the Carnegie Steel Company struck this morning out of sympathy for the locked out men. This will stop all outside work till a new force can be secured. A mass meeting of workmen was held this afternoon to arrange for the relief of the starving Hungarians and others who are suffering as the result of the lock-out. A relief organization under the control of a committee was perfected, and instructions were given that the money in hand be distributed in accordance with the needs of those applying for it. The meeting was addressed by Rev. Samuel Fellows, of Chicago, Bishop of the Reformed Episcopal Church. In alluding to the Pinkerton agency he said that Homestead had dealt a death blow to that illegal organization. A handsome compliment was paid to President Hugh O'Donnell by a rising vote of thanks for his efforts on behalf of his fellow workmen.

CINCINNATI, Ohio, July 15.—One afternoon paper says that since Sunday the agents of Carnegie's mill have collected in this city 270 or 280 men to take the place of the strikers at Homestead. The men were gathered one by one from various down town saloons and street corners and offered from $3 to $5 a day. The gang that was selected has been sent to Pittsburg in sections.

The Cœur d'Alene Troubles.

SPOKANE, Wn., July 15.—Word has just been received that the terrific explosion heard over in Cœur d'Alene last night was caused by strikers blowing up the railroad buildings between Mullan and Wallace.

MISSOULA, July 15.—The Fort Keogh troops passed here at 4 o'clock this morning. Two loud explosions were heard west of Mullan last night, but as the wires are cut definite information cannot be obtained. It is reported that the miners threaten to blow up all the mills if forced out by the militia. An order was received from the provost marshal: "To the Union Pacific and Northern Pacific Railway Co. You are hereby directed not to sell tickets or transport passengers through the country of Shoshone to-day. This order has no effect in carrying U.S. mails and express and passengers under passes from the military authorities." The order was issued for the purpose of preventing disturbers from entering the affected districts. A similar dispatch was received by A. D. Charlton of the Northern Pacific, and the officials of both companies will comply with the instructions. The following was subsequently received: "Wardner, July 15—Everything is quiet in Cœur d'Alene. The troops are in possession of all points, and the miners have disbanded. No further trouble is anticipated. The troops will probably remain here some time." The Union Pacific officials received word from the owners of the Bunker Hill and Sullivan mines that they wanted a special train to report at Tekoa this afternoon. As it is to run up to the mines from Tekoa, it is supposed that the purpose is to carry non-union men back to resume work.

"I would like to sound the praise of Hood's Sarsaparilla over the entire universe," writes Mrs. Longenecker of Union Deposit, Penn.

Children Cry for Pitcher's Castoria.

How They Do It at Buffalo.

BUFFALO, July 16.—Wm. Watts, a well-known produce dealer in this market, who brings most of his goods from Canada, was arrested this afternoon by the U. S. officials on the charge of smuggling opium. He had been under suspicion for some time, and had been watched. The officials learned that he was in the habit of bringing over about $3000 worth of opium each trip. His scheme was suspicious. He lined the bottom of his wagon with eggs and in the centre put a quantity of opium. The bottom layers of egg crates were usually filled with opium. Watts made about $3 a can on the stuff. There are about a dozen Chinamen implicated in the scheme, and they will all be arrested to-morrow. The Canadian end of the gang will also be taken in to-morrow.

The U. S. and Samoa.

WASHINGTON CITY, July 15. — By treaty with Samoa the United States has acquired the right to establish a station for coal and other naval supplies for her naval and commercial marine, and Attorney-General Miller has given an opinion that the right conveyed by the treaty included the right to make the provision relating to a coaling station operative by the purchase or transfer of land from native or other Samoan owners to this Government. Legal steps toward the purchase have been taken. It is expected that within a year the United States will possess an adequate coaling station on the Pacific Coast.

African Natives Rebel.

BERLIN, July 15.—The Zanzibar correspondent of the Berliner Tagblatt telegraphs that an anti-German rebellion has broken out in Unanamble, and that the natives have taken the field against the Europeans.

The reduction sale of carpets, rugs, chenille curtains and art squares still goes on at Weiler Bros. Special attention is called to some large seamless velvet squares at exceptionally good value. If you intend getting a new carpet in the near future it will pay you to come and order in now.

The Silver Vote.

WASHINGTON, July 15.—An analysis of the vote in the House which killed the free silver bill shows that the vote in the affirmative was cast by 115 Democrats, including the speaker, 10 Alliance, 8 Republicans. The Republican were Bowers, Cheatham, Clark of Wyoming, Johnson of Indiana, Jolly, Sweet, Post and Townsend. The negative vote was cast by 94 Democrats and 60 Republicans. This vote is a dead blow to silver legislation at this session. The Stewart bill remains at the foot of the long roll of bills, sleeping the sleep of death on the overburdened calendar. Tracey of New York made a formal parliamentary motion to reconsider the vote and table the motion, and the House proceeded to consider other busines, passed fifty-seven private pension bills and adjourned.

THE MAN ABOUT TOWN

THERE'S a divinity that shapes our ends, rough hew them as we will." So sang the immortal bard, and in the presence of the outbreak of smallpox we might devoutly echo his words. "There's a providence in everything," and the citizens of Victoria should learn the lessons of that providence. I observe one lesson being learnt everywhere, and that is the thorough disinfecting of residences, stores, outhouses and workshops of every description, apart from any actual danger. This is an excellent preventative of many lurking diseases, and Victoria is being thoroughly cleansed now. Another lesson I hope will be learnt and carried out is the erection of a permanent civic hospital for infectious diseases. The small amount of accommodation for this purpose at the Jubilee Hospital is painfully apparent, and being under private management is subject to a good deal of red-tapeism, more than it would under the absolute sway of a municipal health officer.

The quarantine declared by Vancouver is doubtless illegal and ill-advised. In order to test the question let a committee of citizens meet together, guarantee expenses, and try the issues involved in our Supreme Court. Each of our newspapers might furnish a victim to the wrath of the mainlanders and skilful counsel might argue the case.

It is a pity to see our business streets built upon with so little regard to symmetry. Each succeeding architect seems to have no desire to harmonize with previous erections. On Yates street, for instance, in brick blocks is seen two storey, three storey and four storey buildings, with every variety of design. This is one of the advantages of leaseholds, as the land owners invariably insist upon a harmonious design upon all the ground rented for the erection of stores or dwelling houses. Harmony does not necessarily mean sameness. QUIZ.

A Giant Fog-Splitter.

Captain T. K. Bingham, United States military attache at Berlin, has recently brought to the attention of the lighthouse board an important discovery in flash lights, the invention of Professor Schevin, of Berlin. The apparatus is only two meters high by 25 centimeters in diameter. On the inside is a bellows through which benzine gas is passed, while air is forced through pumice stone strongly impregnated with benzine. This benzine gas is then passed through very finely powdered magnesium and saturated therewith; thence it passes out of an upright pipe through a small flame, by which it is lighted, and here it develops a luminosity of 400,000 candles. The activity of the apparatus is regulated by clockwork. Economy is an important feature of the new invention, but its greatest advantage is its ability to penetrate an almost opaque atmosphere to a greater extent than any other light hitherto produced. With the use of 10 centigrammes of the magnesium powder it is shown by the official documents presented by Captain Bingham that a flash of 400,000 candle power can be produced and the flash can be seen on a clear, sunshiny day at a distance of six miles. The lighthouse officials are so well impressed with the new light that they have ordered an apparatus to be used in experiments at Staten Island. They have also brought the matter to the attention of the chief signal officer, who will enquire into its merits for military signalling. The navy officials will also take it up.—Washington City special in New York Herald.

A Good Map.

Messrs. Rand, McNally & Co., the well-known Chicago publishers, have issued a very complete and useful pocket map of British Columbia. The excellence of this firm's work is a matter of common knowledge, and the map spoken of is up to the standard. A special feature is the carefully prepared index, which sets forth the railroad and express routes, and shows the location of all points of any importance in such a manner as to be most useful to shippers. Rivers, lakes, creeks, railroad stations, etc., are indexed very minutely. There are a few minor mistakes in the map, but none of any importance appear from a general survey.

At the Police Court.

Frederick J. Dawley was summoned before Magistrate Macrae this morning charged with assaulting Otto Willmor. After hearing the evidence offered the court court dismissed the case. Kay Murna, a Jap, who had been drunk, admitted cutting a coat worth $12 owned by B. Williams & Co., and was called upon to pay a fine of $10, and also to pay Mr. Williams $8 for damage done the coat. A month in jail was the alternative. A common drunk was also before the court and was allowed to go.

Where Did He Get That Coat?

Last night Officer Smith noticed a suspicious character moving around the city trying to dispose of a waterproof coat at the second hand stores. Suspecting that the coat had been stolen, he endeavored to find out the truth or falsity of his suspicions. The man gave the constable the coat and then gave him the slip. To-day the police were looking for the suspect but did not locate him.

Eternal Vigilance

Is the price of health. But with all our precaution there are enemies always lurking about our system, only waiting a favorable opportunity to assert themselves. Impurities in the blood may be hidden for years or even for generations and suddenly break forth, undermining health and hastening death. For all diseases arising from impure blood Hood's Sarsaparilla is the unequalled and unapproached remedy. It is King of them all, for it conquers disease.

Pipe Smokers.

You may be satisfied with the brands of tobaccos you have been using for years. Grant it; that you are satisfied. As there is always room for improvement, we ask you to try our OLD CHUM PLUG, or CUT smoking tobacco; we believe you will be BETTER satisfied. In any case, a trial won't hurt you. m-w-s

Children Cry for Pitcher's Castoria.

MRS. THOS. WATTAM.

A WONDERFUL DELIVERANCE FROM DANGER!

A Serious Case of "Prolapsus Uteri."

THE DOCTORS COULD GIVE NO RELIEF.

Paine's Celery Compound is Tried and Works Marvelously!

TESTIMONY THAT WILL GLADDEN MANY HEARTS.

In Canada, as in other lands, physicians derive fully three-forths of their income by professional attendance on women. We boldly assert that the great majority of women suffer through their own neglect and thoughtlessness. Thousands of women seem to bid defiance to nature's inexorable laws; they mark out for themselves a line of life and follow out their own course, until suddenly and abruptly halted by suffering and disease. Nature is long-suffering, patient and enduring, but always resents, when tried and trifled with too long. Nature's laws, when observed by women, rich or poor, are always kind and gentle. Nature's laws, when observed and followed, are paths of peace and pleasantness; and her rewards are many and great in this life, and help to prepare for future bliss when earth is left behind.

We acknowledge that many estimable and good women, owing to circumstances of life and home, are made to suffer keenly and severely. The pressing and urgent cares of families demand their best efforts of mind and physical strength. The loving, uncomplaining and toiling mother works day after day for husband and children until she becomes broken-down and weak. This is the class of women with whom we sympathize; it is for them that special efforts should be made, in order to relieve their distresses, burdens and tribulations.

To-day, our aim is to offer comfort and consolation to all, who, through circumstances over which they have no control, are suffering. Physicians are aware of the fact that general debility, physical weakness and a run-down constitution, bring on that terrible trouble, "Prolapsus Uteri," or "Falling of the Womb."

Fortunately for such sufferers science has provided a remedy that is sure and unfailing—a remedy that has wrought wonders in scores of serious cases—we refer to Paine's Celery Compound, now so well known in every part of our Dominion as "Canada's honest and trustworthy medicine."

Thousands of women in our midst, weakened by physical suffering, are victims of the terrible ailment just referred to. Their condition is a truly dangerous and precarious one, and demands instant attention if life is valued. Their great danger is only known and understood by those who have seen the terrible results that follow when such troubles are neglected. Such women require new strength and new vigor. They require an agent that can build up in flesh, blood, bone and muscle. Every ligament, cord and nerve require a strengthening power.

This work cannot be accomplished by the ordinary treatment of the physician; a special remedy must be used to produce desired results. To-day, there is only one remedy in the domain of medicine that can meet the urgent wants of sufferers from "Prolapsus Uteri." This unfailing remedy—wonderful in its workings and power—was tried recently by Mrs. Thomas Wattam, of Plevna, Ont., and the results were quick and effectual. This lady had tried the skill of physicians, and the virtues of other boasted remedies; but all proved failures. Paine's Celery Compound, always true, honest and reliable, worked wondrously as soon as it was tried, and brought new hope and ecurage to a heart almost despondent and fainting owing to past failures. This is only one strong proof out of many, which proves the vast superiority of Paine's Celery Compound over every other agent, whether in liquid or pill form. The glad news now conveyed to the women of Canada by Mrs. Wattam's testimonial, will be hailed with delight and great joy; and numberless women will, without doubt, be constrained to use the same great healing power.

Paine's Celery Compound is no stranger seeking for recognition and support. It is now the family medicine of Canada, and has achieved a degree of fame never reached by any other preparation. It has the confidence of men and women; it fulfils every promises; it never deceives; it raises to life and strength and spreads happiness in our land.

Mrs. Thos. Wattam has sent us the following testimonial, which is interesting and assuring:

"WELLS & RICHARDSON CO.

"DEAR SIRS:—I was advised by a friend a short time ago to give your Compound a trial, as I had received no relief from the doctors. I have been suffering about two years from "Falling of the Womb" and general weakness. I am now happy to state that I am better at present than for a long time past. I am just finishing my second bottle; and if I keep on improving as I have done in the last month, I will be a well woman in a very short time—thanks to your medicine; it is a most wonderful remedy for such complaints as mine. You can use this as you see fit; and I am willing to answer any questions asked of me, by those who are troubled in the same way. Wishing you every success with your remedy, I am,

"Faithfully yours,
"MRS. THOS. WATTAM,
"Plevna, Ont."

DR. J. D. HELMCKEN,
DR. J. C. DAVIE.

All persons who can pay will be expected to do so, the charge fixed being One Dollar. Those who are unable to pay will be vaccinated free of charge, the expense being borne by the Provincial Government.

The lymph used by the above named physicians is not imported, but has been cultivated by the doctors themselves who guarantee its purity.

By order.

J. C. DAVIE, M.D.,
jy15 Provincial Health Officer.

VACCINATION

In order that vaccination may be carried out with dispatch, the medical men of the city have arranged with me to vaccinate all those who are unable to pay free of charge, and that those who can afford to pay, a charge of $1 will be made.

The public vaccinators of the city will vaccinate free all those who are in need of vaccinating.

A certificate of vaccination will be given in every case of where the vaccination has been successful.

G. L. MILNE, M.D., Health Officer.

PROVINCIAL Royal-Jubilee-Hospital.

Any person, other than accident cases, seeking admission into this institution, must first have an order signed by either Drs. Davie or Hanington. Visitors will not be permitted to see patients in the public wards until further orders. Any visitor wishing to see a pay patient must have an order signed by Drs. Davie or Hanington.

By order. H. M. YATES,
jy14 Secretary.

PROVINCIAL Royal Jubilee Hospital.

All patients seeking admission to the above named institution must remain outside the grounds until examined by Dr. W. A. Richardson, Resident Medical Officer, at the gates nearest to the buildings. Directors will please only sign cards of admission subject to this order.

JOSHUA DAVIES,
jy12 President.

COAL

The New Vancouver Coal Mining & Land Co., L'd.

(FORMERLY THE VANCOUVER COAL CO.),

ARE THE LARGEST COAL PRODUCERS ON THE PACIFIC COAST.

THE NANAIMO COAL (Used principally for Gas and Domestic Purposes.) | **THE SOUTH FIELD COAL** (Steam Fuel).

THE NEW WELLINGTON COAL (House and Steam Coal) are mined by this Company only.

THE "NANAIMO" COAL gives a large percentage of Gas, high Illuminating Power, unequalled by any other bituminous Gas Coal in the world, and a superior quality of Coke.

THE "SOUTH FIELD" COAL is now used by all the Leading Steamship Lines on the Pacific.

THE "NEW WELLINGTON" COAL, which was introduced early in the present year, has already become a favorite fuel for domestic purposes. It is a clean, hard coal, makes a bright and cheerful fire, and its lasting qualities make it the most economical fuel in the market.

The several Mines of the Company are connected with their Wharves at Nanaimo and Departure Bay where ships of the largest tonnage are loaded at all states of the tide. Special dispatch is given to Mail and Ocean steamers.

SAMUEL M. ROBINS,
Superintendent.

SOME OF THE COSTLIEST THINGS.

But the Values Are Not Expressed Entirely by Dollars and Cents.

New York Sun: The State Capitol at Albany, N.Y., is the costliest building of modern times. Nineteen million six hundred thousand dollars have been expended on it to date. The Capitol at Washington from 1793, when its corner stone was laid, to 1878, had cost, including its expensive furniture, its almost annual alterations and repairs, less than $13,000,000.

The most expensive municipal hall in the world and the largest in the United States is the City Building of Philadelphia. The largest clock in the world is to be in its tower.

The most expensive Legislature in the world is that of France, which costs annually $3,600,000. The Italian Parliament costs $480,000 a year.

The next to the highest price ever paid for a horse in the world was $105,000, for which Axtell, the trotter, was sold in Indiana at the age of 3. January 11, 1892, Arion was sold by Senator Stanford to I. Malcolm Forbes of Boston for $150,000. That beats all prices. Charles Reed of the Fairview Farm, Tenn., gave $100,000 for the great stallion, St. Blaise, at a sale in New York in October, 1891.

The costliest paintings of modern times are Meissonier's "1814" and Millet's "The Angelus." M. Chauchard gave 850,000 francs ($170,000) for "1814" and 720,000 francs ($150,000) for "The Angelus." Mr. Henry Hilton in 1887 paid $66,000 for Meissonier's "Friedland, 1807," and presented it to the Metropolitan Museum of Art.

The most costly book in the world is declared to be a Hebrew Bible now in the Vatican. In 1512 it is said that Pope Jules II. refused to sell the Bible for its weight in gold, which would amount to $103,000. This is the greatest price ever offered for a book.

In 1635 a tulip bulb was sold in Holland for $2,200. It weighed 200 grains.

The costliest meal ever served, according to history, was a supper given by Ælius Verus, one of the most lavish of all the Romans of the latter days, to a dozen guests. The cost was 6000 sestertia, which would amount to £48,500, or nearly a quarter of a million dollars. A celebrated feast given by Vitellius, a Roman Emperor of those days, to his brother Lucius, cost a little more than $200,000. Suetonius says that the banquet consisted of 2000 different dishes of fish and 7000 different fowls, besides other courses.

The largest sum ever asked or offered for a single diamond is £430,000, which the Nizam of Hyderabad agreed to give to Mr. Jacobs, the famous jeweler of Simla, for the "Imperial" diamond, which is considered the finest stone in the world.

The costliest toy on record was a broken-nosed wooden horse which belonged to Napoleon Bonaparte and was sold a year or two ago for 1000 francs.

The costliest cigars ever brought to this country were of the brand made for the Prince of Wales in Havana, the manufacturer's price for which was $1.87 apiece.

The costliest mats in the world are owned by the Shah of Persia and the Sultan of Turkey. The Shah and the Sultan each possess a mat made of pearls and diamonds, valued at more than $2,500,000. The largest mat ever made is owned by the Carlton Club of London and is a work of art.

The costliest crown in Europe, experts say, is that worn by the Czar of Russia on state occasions. It is surmounted by a cross formed of five magnificent diamonds resting upon an immense uncut but polished ruby. The ruby rests upon 11 large diamonds, which in turn are supported by a mat of pearls. The coronet of the Empress, it is said, contains the most beautiful mass of diamonds ever collected in one band.

The most expensive royal regalias in the world are those of the Maharajah of Baroda, India. First comes a gorgeous collar containing 500 diamonds, arranged in five rows, some as large as walnuts. Top and bottom rows of emeralds of equal size relieve the lustre of the diamonds. A pendant is a single brilliant called the "Star of the Deccan." The Maharajah's special carpet, 10x6 feet, made of pearls with a big diamond in the centre and at each corner, cost $1,500,000.

The most valuable gold ore ever mined in the United States, and probably in the world, was a lot containing 200 pounds of quartz, carrying gold at the rate of $50,000 a ton. It was taken from the main shaft of the mine at Ishpeming, Mich.

The greatest sum every paid for telegraph tolls in one week by a newspaper was the expenditure of the London Times for cable service from Buenos Ayres during the revolution in the Argentine Republic. The cost of cabling from Buenos Ayres to London was $1.75 a word, and the Times paid out $30,000 for one week's dispatches.

W. J. Florence, the comedian, once offered $5000 for a catch phrase about which an American comedy could be written. Nobody supplied the demand.

The costliest phrase in recent years was "Rum, Romanism and Rebellion."

ELECTRICAL DISCOVERY.

The Phonophore Telegraph Working Successfully in England

St. James' Gazette: To be told that a telegraph wire which is busily transmitting a long message can at the same time be made to convey half a dozen other messages in opposite directions sounds like a fairy tale; that the thing can be done, and but is daily being done, is attested upon the most respectable scientific authority. The discovery which renders these astonishing results possible is due to C. Langdon-Davies, who has for some years been engaged in rendering it practically workable, and in adapting it alike to telephonic and telegraphic use. It is difficult to convey to the lay mind an accurate comprehension of a process so exceedingly technical; but it may be briefly said that Mr. Langdon-Davies in the phonophore utilizes, not the electric current, but the noises caused by induction. The signals are transmitted by a series of induced electric impulses, and the success of the system is found in the ability of the inductive force to pass through insulations which electric currents cannot penetrate. A wire may be blown down and in contact with the earth, yet, so long as it is not broken, it will carry a phonophoric message. By means of the phonophore messages can be transmitted with extraordinary rapidity, and there is practically no limit to the number of telegrams that can be sent simultaneously upon the same wire. And, as we have hinted, Mr. Langdon-Davies' system is as useful telephonically as it is telegraphically. A wire which is conveying electric signals can at the same time be used for telephonic conversation without either the message or the conversation suffering in the least. For some considerable time past experiments in both directions have been proceeding, with most gratifying results, which are vouched for by such high authorities as Prof. Sylvanus Thompson, Conrad Cooke, and Latimar Clark. Three of the principal railway companies have already adopted the phonophore; and it must be obvious, even to the unscientific mind, that phonophoric telegraphy and telephony, in so vastly increasing the electrician's power over the wires, has before it a very great future. The phonophore, indeed, increases almost to infinity the number of words that can be transmitted in a given time. It is obvious, therefore, that it offers great possibilities in the way of cheapening the cost of telegrams. So long as the number of words that could be carried by a wire in an hour was rigidly limited it was hopeless to look for any substantial reduction in the cost of telegraphing, but the phonophore at once increases the speed of every wire to which it may be fitted.

POPE LEO XIII.

Some Questions Which Now Greatly Interest the Catholic World.

Leo XIII. is in his 83rd year. He has suffered from frequent attacks of illness; but "threatened men live long." He has expressed an earnest desire for longer life, saying that he has still more work to do, and praying that he may be spared till it is finished. That the Pope's views on many important points have been greatly modified, if not altogether changed, does not admit of a doubt, writes Richard B. Kimball, L.L.D., in Frank Leslie's Popular Monthly. Reconciliation with all nations, the cure of souls, the condition of the working classes, are what at the close of his long life, it is said, occupy his thoughts and his devotions. But so long as he lives Pope Leo will remain master, and diplomacy will have no more accomplished adherent than he.

There remain many subjects which now appear to greatly interest the Catholic world, and especially the Catholics of the United States. These may be resolved into the following questions:

1. Should the papal seat remain at Rome, despite the hostility of the Italian government and its power to harass?
2. Must the pope necessarily be an Italian?
3. Ought the pope to posess temporal power?
4. If so, how is it to be recovered?

The most unanimous opinion on the first point is in the affirmitive. All the traditions of the church point to Rome. The treasures and the glories of the Vatican can never be reproduced elsewhere. The famous schools and colleges for educating the priesthood in every possible branch of classical and mediæval knowledge, in philosophy, science canon and civil law, are in and around Rome. The Italian legislature has confirmed to the church the possession of the Vatican and its surroundings, and it would not dare in the presence of the nations to repeal the grant. Such is the argument employed by all Catholics for maintaining the pontificate at Rome.

In regard to the second question, opinion in the United States is divided. Why should the pope be an Italian? is asked. Why not create a fresh current of thought by changing his nationality? His election would, of course, be at Rome, and in accordance with the rules of the church. The cardinal at the head of the propaganda, who is next in authority to the pontiff, is a Pole. Why not the next pope American?

On the third point there is a little division of opinion. The pope should have temporal power. He should control territory absolutely. The unanimity of feeling on this subject is remarkable. Two reasons are urged. The very devout declare that the papal states belong to the church by divine right, and it was an act of sacrilege to deprive the church of what God had bestowed. A more practical view is taken by others. The pope, they say, has to communicate indirectly with 200,000,000 Catholics scattered over the earth. He ought to be in a position to this independently, free from any possible interference, which he cannot do except from within his own dominions.

But how are the papal states to be restored to the church? One answer is given to this—By diplomacy! Pope Leo is already planning in this direction, and his great sagacity will, if he lives, bring it to pass.

"I would like to sound the praise of Hood's Sarsaparilla over the entire universe," writes Mrs. Longenecker of Union Deposit, Penn.

ABSOLUTELY PURE

THE GREAT TEMPLE OF BAAL.

Description of the Ruins of What Was Once a Magnificent Building.

Blackwood's Magazine.]

There rises a huge wall 70 feet high, inclosing a square court of which the side is 740 feet long. Part of the wall, having fallen in ruins, has been rebuilt from the ancient materials; but the whole of the north side, with its beautiful plasters, remains perfect.

As the visitors enter the court they stand still in astonishment at the extraordinary sight which meets their eyes; for here, crowded within those four high walls, is the native village of Tadmor. It was natural enough for the Arabs to build their mud huts within these readymade fortifications, but the impression produced by such a village in such a place is indescribably strange.

The temple, so to speak, is eaten out at the core and little but the shell remains. But here and there a fluted Corinthian column or group of columns, with entablature still perfect, rises in stately grace far over the wretched huts, the rich, creamy color of the limestone and the beautiful molding of the capitals contrasting with the clear blue of the cloudless sky. The best view of the whole is to be obtained from the roof of the naos, which, once beautiful and adorned with sculpture, is now all battered and defaced, and has been metamorphosed into a squalid little mosque.

To describe the view from that roof were indeed a hopeless task. High into the clear blue air and the golden sunshine rise the stately columns; crowded and jumbled and heaped together below untouched by the gladdening sunbeams, unfreshened by the pure, fresh air, lies all the squalor and wretchedness of an Arab mud-hut village.

Pure coffee, with pure cream, at the Dairy Kitchen.
